A net decrease of $\$ 59$ million in loans to manufacturers of metals and metal products was the principal factor in the $\$ 45$ million decrease in commercial and industrial loans at weekly reporting member banks during the week ended July 31.

Partially offsetting net increases during the week were $\$ 21$ million in loans to sales finance companies and $\$ 12$ million to manufacturers of textiles, apparel, and leather products. Loans to unclassified borrowers decreased \$24 million.

Changes in loans during the week and since mid-year are shown below; the third column shows the changes during the comparable period last year:
