

September 14, 1918.

Following is the fourth of the weekly statements issued by the Federal Reserve Board designed to show more accurately than heretofore the volume of the nation's banking business. The statement comprises returns of total amounts of debits to deposit account of clearing house banks in over 100 of the country's principal cities. Transactions during the two weekly periods ending Wednesday, September 4 and 11 are given. A recapitulation is added in which totals are given by Federal Reserve districts of returns made by cities reporting both weeks. Efforts for completing the list of reporting cities are being continued. It is hoped that before long satisfactory arrangements will be made with practically all active clearing houses whereby the Board's weekly figures will be made as comprehensive as the figures of bank clearings at present published by the clearing houses and the financial press.

Figures of reporting clearing houses by Federal Reserve districts are as follows (in thousands of dollars, i.e., 000's omitted):
