## BANK DEBITS

Volume of business for the week ending June 28 totaled \$8,613,000,000, or 8.4 per cent below the total of \$9,403,000,000 for the preceding week, which included considerable amounts charged to deposit account in connection with the payment of the June 15 installment of income taxes. Smaller totals are reported by all the important cities, Boston, Philadelphia, Chicago, St. Louis and San Francisco reporting more than average declines for the week. For New York City a reduction of \$238,000,000, or of 4.7 per cent for the week, is shown.

As compared with the week ending June 29, 1921, the volume of business for the week under review shows an increase of \$1,498,000,000, or of over 20 per cent. By far the larger part of this increase, viz., 80 per cent, is reported for New York City. Larger figures are also given for the other more important cities, except Baltimore, Richmond, Washington, D. C. and San Francisco.

The volume of business is measured by debits to individual accounts reported to the Federal Reserve Board for banks in clearing house centers. The total number of centers reporting this week is 248, of which 166 are included in the summary by Federal reserve districts.
