BANK DEBITS.

Volume of business for the week ending September 6, as measured by debits to individual accounts reported to the Federal Reserve Board for banks in leading centers, totaled \$7,406,000,000, or \$162,000,000 in excess of the total for the preceding week. This increase is quite notable, in view of the fact that the week contained only five business days, and is due in large part to end-of-month transactions effected during the week. All of the larger centers, except Philadelphia, Pittsburgh, Chicago, Detroit, and Milwaukee show larger figures than the week before. New York City reports an increase of \$95,000,000. Substantial increases for the week are also shown for San Francisco, Los Angeles, and Dallas.

As compared with the week ending September 7, 1921, the volume of business for the week under review shows an increase of \$1,153,000,000, or of about 19 per cent. For New York City, partly because of the larger volume of stock exchange transactions an increase of \$918,500,000, or nearly 80 per cent of the total, is shown. Increases over corresponding 1921 figures are also shown for all the other larger centers, except Baltimore, Minneapolis, and Kansas City.

The total number of centers reporting this week is 249, of which 166 are included in the summary by Federal reserve districts.
