\* For each item on the G.7 release that is affected by shifts of assets to IBFs, this table provides seasonally adjusted estimates including amounts shifted from U.S. banking offices to IBFs. These adjusted levels are appropriate for measuring growth rates in loans and securities abstracting from the breaks in series resulting from the shifts of assets to IBFs. The break adjusted series shown above was derived by adding the IBF shifts before seasonal adjustment and then averaging seasonally adjusted data in the usual manner--i.e., averaging weekly data for domestically chartered banks and averaging last-Wednesday-of-month data for foreign-related institutions.
