

FEDERAL RESERVE statistical release

G.7 (407)

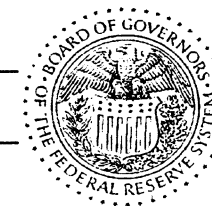

Revision of G.7 Series

March 1, 1991

Bank credit data in this issue of the G.7 release have been revised to reflect new benchmark and seasonal adjustments as well as revisions in data received from sample banks that report data weekly. The benchmark adjustments involve use of new blowup ratios derived from quarterly condition reports dating from March 31, 1990 through September 30, 1990 for all insured banks and all foreign-related institutions that are represented in the commercial bank universe. These blowup ratios are used in conjunction with the weekly reports from sample banks in estimating totals for the banking system as a whole.

Revised historical data are available on request from the Division of Monetary Affairs, Banking and Money Market Statistics Section, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

1. Data are prorated averages of Wednesday estimates, based on weekly sample reports and quarterly universe reports.

2. Excludes loans to commercial banks in the U.S.

3. Includes nonfinancial commercial paper held.

4. U.S. includes the 50 states and the District of Columbia.

5. Any agricultural loans, loans to individuals, loans to states and political subdivisions, or lease financing receivables (not available separately) are included in all other loans.
