## DEPARTMENT STORE SALES IN JUNE 1935 Preliminary report

From May to June there was little change in the dollar volume of department store sales, which usually decline at this season. Consequently, the Federal Reserve Board's index, which makes allowance for differences in the number of business days and for usual seasonal movements, rose to 80 in June, on the basis of the 1923-25 average as 100, compared with 76 in May and 74 in June 1934.

Total dollar volume of sales in June was larger than a year ago by 4 percent. The aggregate for the first six months of this year was 2 percent larger than for the corresponding period last year.
