For inmediate release January 19, 1967

## MAIURIITY DISIRIBUTITON OF OUPSTANDING NEGOTIABLE TIME CERTIFICAIES OF DEPOSITS

On December 28, 1966, 258 weekly reporting large cormercial banks reported negotiable certificates of deposit (CD's) outstanding in denominations of $\$ 100,000$ or more of $\$ 15.6$ billion, an increase of $\$ 0.2$ billion since the previous survey on November 30. Most of the increase was at very large banks (with deposits of \$l billion or more). As in the previous three monthly surveys, the month following the survey date showed the largest amount maturing--about 41 per cent of all outstandings were scheduled to mature before the end of January. Maturities in the period ending with the third month after the survey date included 68 per cent of all outstandings, about the same as in other recent surveys.

The average maturity of all outstanding CD's was 3.0 months as compared to 2.9 months as of November 30 and 3.2 months as of October 26. The average maturity of CD's for all but the largest bank size group was unchanged. At the largest banks, \$l billion deposits and over, average maturities increased from 2.9 to 3.0 months.

The distribution of maturities by bank size is shown on the back of this release.

Outstanding Negotiable Time Certificates of Deposit Large Commercial Banks, December 28, 1966

| CD's Maturing in | In millions <br> of dollars | Percentage <br> distribution | Cumulative <br> percentage |
