## MATURITY DISTRIBUTION OF OUTSTANDING NEGOTIABLE TIME CERTIFICATES OF DEPOSIT

On April 26, 1967, 266 weekly reporting large commercial banks reported $\$ 18.6$ billion negotiable certificates of deposits (CD's) outstanding in denominations of $\$ 100,000$ or more. This was a decrease of $\$ 0.7$ billion since the previous monthly survey on March 29. The group of largest banks accounted for almost all of the decline.

The month following the survey date continued to show the largest amount maturing but the proportion of the total was smaller. For the March survey 27 per cent matured before the end of April and for the April survey 23 per cent matured before the end of May.

The average maturity of all outstanding CD's, at 3.8 months, was slightly longer than in the January and February surveys and was the longest reported since monthly surveys were begun in June 1966.

The distribution of maturities by bank size is shown on the back of this release.

Outstanding Negotiable Time Certificates of Deposit Large Commercial Banks, April 26, 1967

| CD's Maturing in | In millions <br> of dollars | Percentage <br> iistribution | Cumulative <br> percentage |
