11. Rate for the Fedaral Reserve Bank of New York.
12. Auction date for daily data; weekly and monthly averages computed on an issue-date basis.
13. Yields on actively traded issues adjusted to constant maturities. Source: U.S. Treasury.
14. Unweighted average of rates on all outstanding bonds neither due nor callable in less than 10 years, including one very low yielding "flower" bond.
15. Estimate of the yield on a recently offered, A-rated utility bond with a maturity of 30 years and call protection of 5 years; Friday quotations.
16. Bond Buryer Index, general obligation, 20 years to maturity, mixed qualitys Thursday quotations.
17. Contract interest rates on commitments for fixed-rate first mortgages. Source: FHLMC.

Note: Maekly and monthly figures are averages of business days unless otherwise noted.

## DESCRIPTION OF THE TREASURY CONSTANT MATURITY SERIES

Yields on Trassury securities at 'constant maturity' are interpolated by the U.S. Treasury from the daily yield curve. This curve, wich relates the yield on security to its time to maturity, is based on the closing market bid yields on actively tradad Treasury securties in the over-the-counter market. These market yields are calculated from composites of quotations reported by five leading U.S. Government securities deelers to the Federal Reserve Bank of Now York. The constant maturity yield values are read from the yield curve at fixed maturities, currently 1, 2, 3, 5, 7, 10, and 30 years. This method provides a yield for a 10 -year maturity, for example, even if no outstanding security thas exactly 10 years romaining to maturity.
