

H.14

May 31, 1956

CAPITAL MARKET DEVELOPMENTS

The volume of publicly offered securities was large during the week ending May 25, but this week, with a mid-week holiday, volume will be much smaller. Corporations sold large issues totaling \$100 million during the week ending May 25, and eight large State and local government issues aggregating \$116 million were sold. A \$25 million corporate debenture issue and a \$8 million State and local issue are the only large offerings scheduled for sale during the week ending June 1.

Bond yields - Yields on outstanding corporate and State and local government bonds (except Baa-rated State and local issues) were stable last week, but yields on U. S. Government obligations declined further. The spread between Aaa-rated corporate and U. S. Government (old series) bond yields is now 38 basis points, the widest spread since the summer of 1954.

An Aa-rated 30-year first mortgage electric utility bond issue was reoffered at 3.53 per cent last week, a yield 19 basis points above that on similar outstanding securities. Last week's offering yield was 22 basis points lower than the reoffering yield of a similar issue in late April, when the spread between new offering and outstanding yields was considerably wider (40 basis points).

June security issue volume - Corporate security issues during June are expected to total \$875 million, one-sixth smaller than the estimated May volume, but more than one-fourth larger than the volume in June last year. Much of this volume is expected in take-downs of private placements; large public offerings scheduled for the month total only \$198 million. The \$250 million AT&T offering is now scheduled for sale in early July.

State and local government offerings are expected to total \$700 million for the month of June, a volume two-fifths greater than in May and slightly larger than that of June last year. This estimate includes, however, two issues of over \$100 million only tentatively scheduled for June offering.

Stock prices - Common stock prices, as measured by the SEC index of 265 stocks, declined 11.1 points during the week ending May 25, closing at 268.0. This was the sharpest decline in one week since September 1955 and brought prices to the lowest level since February 17. Daily indexes indicate a sharp increase in prices on Tuesday of this week following a further decline on Monday. Trading volume continues to be light.

*--Single observation, not an average.

^{1/} Covers only 30-year first mortgage bonds, as reported in Moody's Bond Survey. Except where indicated, the actual yield figure and the amount above seasoned yields are averages of offerings during the indicated period and of the differences between these new offering yields and yields on seasoned issues of similar quality for the same day. The number of new issues included in the monthly averages varies from 2 to 4 except for October 1954 when 6 A-rated issues were included. Average maturity for the seasoned issues varies from 26 to 28 years.
