

2188

H.14

July 28, 1958.

CAPITAL MARKET DEVELOPMENTS

The volume of public security financing was moderate last week. Large corporate issues sold totaled \$65 million, while State and local governments offered bonds for \$114 million. This week's calendar is light; rights expire on two corporate issues with proceeds of \$46 million, while one \$40 million State and local government bond offering is scheduled.

Bond yields - Yields on outstanding corporate bonds increased last week, while those on U. S. Government obligations and Baa-rated State and local government bonds decreased slightly. Aaa-rated State and local bond yields were unchanged. A new Aa-rated, first mortgage electric utility bond issue was offered to investors at 4.10 per cent last week, the same yield as that for a comparable offering made the preceding week.

Stock prices - Common stock prices increased sharply last week in the heaviest trading volume of the year. Standard and Poor's index of stock prices closed at 46.97 on Friday, a new high for the year and only 4 per cent below the 1957 peak. Trading volume averaged 3.7 million shares a day.

More detailed information concerning recent capital market developments is presented in the attached exhibits.

Capital Markets Section,

n.a.--Not available. p/ Preliminary.

1/ Standard and Poor's composite index of 500 common stocks, weekly closing prices, 1941-43=10. Monthly data are averages of daily figures rather than of Fridays' only. Highs and lows are for Friday's data only.

2/ Averages of daily trading volume on the New York Stock Exchange.

3/ Standard and Poor's composite stock yield based on Wednesday data converted to weekly closing prices by Federal Reserve. Yields shown are for dates on which price index reached its high or low.

4/ End of month figures for member firms of the New York Stock Exchange which carry margin accounts; excludes balances secured by U. S. Government obligations.

5/ Wednesday figures for weekly reporting member banks. Excludes loans for purchasing or carrying U. S. Government securities at banks in New York and Chicago. Weekly reporting banks account for about 70 per cent of loans to others. For further detail see Bulletin.

Note.--Highs and lows are for individual series and may be on different dates for different series.

\*—Single observation, not an average.

1/ Covers only 30-year first mortgage bonds, as reported in Moody's Bond Survey. Except where indicated, the actual yield figure and the amount above seasoned yields are averages of offerings during the indicated period and of the differences between these new offering yields and yields on seasoned issues of similar quality for the same day. Average maturity for the seasoned issues varies from 26 to 28 years.

2/ Provides for a 5-year period during which issue may not be called for refunding at a lower coupon rate. Monthly averages so marked include one or more issues with such a provision. Other issues have no such provision.
