

H.14

October 6, 1958.

CAPITAL MARKET DEVELOPMENTS

The volume of new public security financing continues to be very small. A state and local government issue for \$13 million was the only large issue sold last week. A corporate issue with proceeds for new capital of \$15 million, which had been rescheduled for sale last week, was again postponed. This week, large corporate offerings, including expiration of subscription rights, are expected to total \$44 million. One large local government issue for \$25 million is also scheduled for sale.

Bond yields - Yields increased last week for all categories of outstanding bonds, except those for Baa-rated State and local government obligations which remained stable. Yields on high-grade corporate bonds reached a new high for the year and are only slightly below the 1957 peak, while yields on U. S. Government obligations reached a record level. High-grade municipal bond yields are 20 basis points below their 1957 peak.

Stock prices - Stock prices established an all time peak last week. Standard and Poor's index of 500 common stocks increased in 4 of the 5 sessions last week, closing at 50.37 on October 3. Trading activity continued to be very active, averaging 3.8 million shares a day.

More detailed information concerning recent capital market developments is presented in the attached exhibits.

n.a.--Not available. p/ Preliminary.

1/ Standard and Poor's composite index of 500 common stocks, weekly closing prices, 1941-43=10. Monthly data are averages of daily figures rather than of Fridays' only. Highs and lows are for Friday's data only.

2/ Averages of daily trading volume on the New York Stock Exchange.

3/ Standard and Poor's composite stock yield based on Wednesday data converted to weekly closing prices by Federal Reserve. Yields shown are for dates on which price index reached its high or low.

4/ End of month figures for member firms of the New York Stock Exchange which carry margin accounts; excludes balances secured by U. S. Government obligations.

5/ Wednesday figures for weekly reporting member banks. Excludes loans for purchasing or carrying U. S. Government securities at banks in New York and Chicago. Weekly reporting banks account for about 70 per cent of loans to others. For further detail see Bulletin.

Note.--Highs and lows are for individual series and may be on different dates for different series.

*—Single observation, not an average.

¹/ Covers only 30-year first mortgage bonds, as reported in Moody's Bond Survey. Except where indicated, the actual yield figure and the amount above seasoned yields are averages of offerings during the indicated period and of the differences between these new offering yields and yields on seasoned issues of similar quality for the same day. Average maturity for the seasoned issues varies from 26 to 28 years.

²/ Provides for a 5-year period during which issue may not be called for refunding at a lower coupon rate. Monthly averages so marked include one or more issues with such a provision. Other issues have no such provision.
