

H.14

January 12, 1959

CAPITAL MARKET DEVELOPMENTS

The volume of new public security financing was quite large last week, but is expected to be much more moderate this week. During the week ending January 9, corporations sold large issues totaling \$159 million and a State government bond issue for \$200 million was also sold. This week, only one large corporate issue for \$20 million is expected. State and local government issues amounting to \$78 million and a foreign government issue for \$75 million are also scheduled for sale.

Bond yields - Changes in yields on outstanding bonds were mixed last week. Yields on U. S. Government and State and local government obligations increased. The increase in those on high-grade State and local governments was substantial, but slight for other types. Corporate bond yields declined slightly.

A new A-rated, first mortgage electric utility bond issue was offered to investors last week to yield 4.75 per cent, higher than that for any comparable offering made in 1958. This new bond offering also included a 5-year nonrefunding provision.

Stock prices - Stock prices continued to increase, on balance, last week with increased trading volume. Standard and Poor's index of 500 stocks closed at 55.77 on January 9, slightly above the previous record peak reached last Monday. The volume of trading averaged 4.2 million shares a day.

More detailed information concerning recent capital market developments is presented in the attached exhibits.

p/ Preliminary.

c/Corrected.

1/ Standard and Poor's composite index of 500 common stocks, weekly closing prices, 1941-43-10. Monthly data are averages of daily figures rather than of Fridays' only. Highs and lows are for Friday's data only.

2/ Averages of daily trading volume on the New York Stock Exchange.

3/ Standard and Poor's composite stock yield based on Wednesday data converted to weekly closing prices by Federal Reserve. Yields shown are for dates on which price index reached its high or low.

4/ End of month figures for member firms of the New York Stock Exchange which carry margin accounts; excludes balances secured by U. S. Government obligations.

5/ Wednesday figures for weekly reporting member banks. Excludes loans for purchasing or carrying U. S. Government securities at banks in New York and Chicago. Weekly reporting banks account for about 70 per cent of loans to others. For further detail see Bulletin.

Note.--Highs and lows are for individual series and may be on different dates for different series.

*--Single observation, not an average.

1/ Covers only 30-year first mortgage bonds, as reported in Moody's Bond Survey. Except where indicated, the actual yield figure and the amount above seasoned yields are averages of offerings during the indicated period and of the differences between these new offering yields and yields on seasoned issues of similar quality for the same day. Average maturity for the seasoned issues varies from 26 to 28 years.

2/ Provides for a 5-year period during which issue may not be called for refunding at a lower coupon rate. Monthly averages so marked include one or more issues with such a provision. Other issues have no such provision.
