CAPITAL MARKET DEVELOPMENTS
IN THE UNITED STATES

The volume of public security financing to obtain new capital was rather moderate last week but is expected to be very substantial this week. During the week ending December 7, no large State and local government bond issues were sold but two large corporate issues totaling \$75 million were offered. This week, ending December 10, four corporate issues amounting to \$123 million and three State and local issues with par value of \$137 million are on the calendar; the Inter-American Development Bank is also expected to offer \$75 million in bonds.

Bond yields. Most seasoned, long-term bond yields rose somewhat last week. Aaa-rated corporate bond yields rose another basis point, but yields on Baa-rated issues fell one basis point further to 4.93 per cent, their lowest level since early-May 1959. Yields on both Aaa- and Baa-rated State and local government bonds went up 3 basis points to 2.92 per cent and 3.57 per cent, respectively; U. S. Government bond yields also edged up one basis point to 3.89 per cent.

Yields on newly offered corporate bonds, adjusted to an Aaa basis, averaged 4.24 per cent last week, 7 basis points above the average for the previous week.

Short- and intermediate-term interest rates. Rates on 3-month and 6-month Treasury bills declined one and three basis points, respectively, last week, while yields on 3-5 year U. S. Government obligations were stable. The Federal funds rate declined 22 basis points from the revised level of the previous week to 2.73 per cent. Other short- and intermediate-term interest rates were unchanged.

Mortgage recordings. Nonfarm mortgage recordings of \$20,000 or less, which had risen to a new high in July, edged off in August, the latest month available on a seasonally adjusted three-month moving average basis. The monthly rate of \$2,933 million was a tenth above the low for the year in March and more than a tenth above a year earlier.

Stock prices. Common stock prices went up moderately further last week in active trading. Prices, as measured by Standard and Poor's composite index of 500 stocks, advanced one per cent to close at 63.06 on December 7. At Friday's level, stock prices were 21 per cent above their late June low but still 12 per cent below their all-time peak of mid-December 1961. Trading volume averaged 4.8 million shares a day, 0.7 million less than the very substantial average of the previous week.

More detailed information concerning recent capital market developments is presented in the attached exhibits.

1/ Total recordings data are estimates based on reports from about 450 areas and include mortgages of \$20,000 or less secured by nonfarm real estate, primarily residential properties. FHA-insured loans represent gross amount of insurance written, and VA-guaranteed loans the gross amount of loans closed, on 1-4 family houses. Conventional data are derived as a residual, although total recordings and VA and FHA loans are not strictly comparable in concept or timing.

Note: Averages of offering yields on all new issues of publicly offered corporate bonds rated Aaa, Aa and A by Moody's Investors Service (except serial and convertible issues, offerings of natural gas pipeline and foreign companies, and bonds guaranteed by the Federal Government) weighted by size of offering. Before averaging, new offerings are adjusted to a composite Aaa basis by deducting from the actual offering yield the excess of the weekly average yield for seasoned bonds of the appropriate industry-quality group over the composite average for seasoned Aaa-rated bonds (Moody's). Averages considered unrepresentative because of special characteristics of the offerings included are denoted by an asterisk.

p/ Preliminary. e/ Estimated by Federal Reserve. n.a.--Not available.

1/ These data differ from those in Exhibit H in that refunding issues, as well as new capital issues, are included. Long-term securities are defined as those maturing in more than one year.

2/ Includes securities offered in the United States by foreign governments and their political subdivisions and international organizations. Source: Securities and Exchange Commission.

3/ Issues not guaranteed by the U. S. Government. Source: Long-term, Securities and Exchange Commission; short-term, Treasury Department and Federal Reserve.

4/ These data differ from those in Exhibit H and above in that they represent new offerings less retirements, whether from the proceeds of refunding issues or from other funds. Data include only issues with original maturity of one year or less.

5/ Principally tax and bond anticipation notes, warrants or certificates and Public Housing Authority notes. In some instances PHA notes included may have a somewhat longer maturity than one year. Source: Bond Buyer and Federal Reserve.
