## CAPITAL MARKET DEVELOPMENTS IN THE UNITED STATES

JAN 30 1963 FEDERAL RESERVE BARK OF RICHMOND

Public security financing to obtain new capital was in substantial volume last week but is expected to be more moderate this week. During the week ending January 25, two large corporate issues to obtain \$75 million in new capital were offered and five State and local government bond issues with par value of \$118 million were sold. This week, ending February 1, a \$108 million State and local bond issues and an \$18 million Japan Development Bank bond issue are scheduled. No large corporate issues for new capital are scheduled this week, but the Dallas Power and Light Company is expected to offer \$25 million in bonds to refund outstanding securities.

Bond yields. Yields on seasoned, long-term bonds either rose or were stable last week. Yields on both Aaa-rated corporate bonds and on Aaa-rated State and local government bonds rose one basis point, while U. S. Government bond yields increased four basis points. Baa-rated corporate and State and local government bond yields were stable.

Average yields on newly offered corporate bonds, adjusted to an Aaa basis, rose nine basis points last week to 4.22 per cent, about the same level as in early January.

Short- and intermediate-term interest rates. Rates on 3-month and 6-month Treasury bills rose three and four basts points, respectively, last week, and yields on 3-5 year U. S. Government obligations advanced six basis points. The average rate of interest on directly-placed finance company paper with 90-179 day maturity declined two basis points to 3.13 per cent, reflecting the full effect of the change in rates the previous week. The average effective Federal funds rate was 3.00 per cent. Other short- and intermediate-term interest rates were unchanged.

Mortgage recordings. Seasonally adjusted nonfarm mortgage recordings of \$20,000 or less continued little changed in October, the latest month available on a three-month moving average basis. At \$2,925 million, the monthly rate was just below the peak of \$2,973 million reached in July and 5 per cent above the advanced rate a year earlier.

Government-underwritten mortgages constituted 26 per cent of total recordings in November. This was the same share as in October and a slightly higher proportion than in November of 1961.

Stock prices. Common stock prices advanced moderately further last week in very active trading. Prices, as measured by Standard and Poor's composite index of 500 stocks, rose over one per cent to close at 65.92 on January 25. At Friday's level, average prices had recovered two-thirds of the loss incurred between the December 1961 high and last June's low.

More detailed information concerning recent capital market developments is presented in the attached exhibits.

Capital Markets Section, Division of Research and Statistics, Board of Governors of the Federal Reserve System.

Federal Reserve Bank of St. Louis

<sup>.—</sup>Not available. p/ Preliminary.
Standard and Poor's composite index of 500 common stocks, weekly closing prices, 1941-43-10.
Monthly data are averages of daily figures rather than of Friday's only. Highs and lows are for
Friday's data only.
Standard and Poor's composite stock yield based on Wednesday data converted to weekly closing
prices by Federal Reserve. Yields shown are for dates on which price index reached its high

or low.

<sup>3/</sup> Averages of daily trading volume on the New York Stook Exchange.
4/ End of month figures for member films of the New York Stook Exchange which carry murgh accounts; excludes balances secured by U.S. Government obligations.
5/ Wednesday figures for weekly reporting member banks. Excludes loans for purchasing or carrying U.S. Government securities. Frior to July 1, 1995, such loans are excluded only at banks in New York and Chicago. Weekly reporting banks account for about 70 per cent of loans to others. For further detail see Bullethin.

n.a.—Not available.

1 Total recordings data are estimates based on reports from about 450 areas and include mortgages of \$20,000 or less secured by nonfam real estate, primarily residential properties. Fila-insured loans represent gross amount of insurance written, and Va-quaranteed loans the gross amount of insurance written, and Va-quaranteed loans the gross amount of loans closed, on 1-4 family houses. Conventional data are derived as a residual, although total recordings and VA and Fila loans are not strictly comparable in concept or timing.

p/ Preliminary. e/ Estimated by Federal Reserve. n.a.--Not available.
1/ These data differ from those in Exhib. H in that refunding issues, as well as new capital issues, are included. Long-term securities are defined as those

maturing in more than one year.

3/ Issues not guaranteed by the U. S. Government. Source: Long-term, Securities and Exchange Commission; short-term, Treasury Department and Federal Reserve.

4/ These data differ from those in Exhibit H and above in that they represent new offerings less retirements, whether from the proceeds of refunding issues or from other funds. Data include only issues with original maturity of one year or less. 5/ Principally tax and bond anticipation notes, warrants or certificates and Public

Housing Authority notes. In some instances PHA notes included may have a some-Digitized Mas Rough Maturity than one year. Source: Bond Buyer and Federal Reserve.

 $<sup>\</sup>underline{2}/$  Included securities offered in the United States by foreign governments and their political subdivisions and international organizations. Source: Securities and Exchange Commission.
