DECONTROLLED AFTER SIX MONTHS Not for Publication 1,1963

November 12, 1963.

MARKET DEVELOPMENTS IN THE UNITED STATES

Public security financing to obtain new capital was in light volume last week but is expected to be in somewhat larger volume this week. Last week, ended November 8- a \$30 million corporate issue and two large State and local government bond issues amounting to \$51 million were sold. This week, ending November 15, two corporate issues (including an expiring rights offer) totaling \$65 million and two large State and local issues with par value of \$70 million are scheduled for offering.

Bond yields. Yields on seasoned long-term bonds either rose or were unchanged last week. Aaa-rated corporate bond vields edged up a basis point to 4.33 per cent, their highest level since early September 1962, while U. S. Government bond yields increased three basis points further to 4.12 per cent, the highest since the spring of 1960. Baa-rated State and local government bond yields also rose a basis point to 3.61 per cent. Yields on Aga-rated municipal and on Baa-rated corporate bonds. however, were stable.

Yields on new corporate bonds, adjusted to an Aaa basis, averaged 4.41 per cent last week, seven basis points above the average for the previous week and the highest since August 1962.

Short- and int-rmediate-term interest rates. Rates on Treasury bills and on 3-5 year U. S. Government obligations increased last week. Yields on 3-month and 6-month Treasury bills rose seven and five basis points to 3.54 and 3.64 per cent, respectively, the highest levels since the spring of 1960. Yields on intermediate-term Treasury obligations increased four basis points to 3.98 per cent, the highest since mid-1960. The average rate on directly-placed finance company paper with 90-179 day maturity, at 3.75 per cent, was unchanged from the revised level of the previous week. The average effective Federal funds rate remained at 3.50 per cent. Other rates were unchanged.

Bond referenda. Preliminary data on the \$1.5 billion of State and local government bond referenda submitted to voters in the November 5 general election indicates that between two-fifths and one-half of the dollar volume submitted was approved. The low ratio of approvals reflects primarily the defeat of one proposal -- \$750 million of New Jersey bonds that were to be secured by surplus turnpike revenues. Excluding this proposal, about nine-tenths of the dollar volume of referenda were approved. The following table shows the results of November general election proposals in recent years; this year's total was relatively small as it usually is in off-year elections. (See table on following page.)

(In millions of dollars)

<u>Stock prices</u>. Common stock prices, as measured by Standard and Poor's composite index of 500 stocks, fell about one-half of one per cent on balance last week to close at 73.36 on November 8. Stock prices, which had been declining for about a week, dropped further on Wednesday, following announcement of an increase in margin requirements from 50 to 70 per cent. By the close on Friday, however, prices had recovered nearly all of the Wednesday loss. Trading volume averaged 5.0 million shares a day, 0.7 million shares less than the previous week.

More detailed information concerning recent capital market developments is presented in the attached exhibits.

Noither mortgage nor bond yields take into account servicing costs which are much higher for mortgages than bonds. Generally, bonds pay interest semi-annually mortgages, monthly. Mortgage yields, if com puted as equivalent to a semi-annual interest investment, would be slightly higher than given in the table.

table.
Z/ Based on FiA field-office opinious about average bid prices in the prints secondary market for new-home mortgages for immediate delivery. Data relate only to 22-year mortgages with down payments of 10 per could or more, weighted by probable we hume of transactions. Yields computed by FEB, assuming 25-year mortgages ray paid off in 12 years. Dashed lines indicate periods of adjustment to changes in the optimatum interest rates.
3/ Based on FiA field office opinion on typical interest rates (rounded) on conventional first mortgages prior to that dash, and the field office opinion on typical interest rates.
3/ Based on FiA field office opinion on typical interest rates (rounded) on conventional first mortgages prior to that date, rate related to both new as well as criting hom mortgages. Dashed line indicates this ohange in the series.
Digitized Semi rots for both to grade. Notice that date, see Enhibit 4.

Note: For retrospective data on aggregate foreign corporate and government security offerings in the United States see Exhibits I and J. There is no simple relationship between the data shown in this Exhibit and that shown in Exhibits I and J because the latter includes privately placed securities in the period in which funds are actually takendown but only in the amount of takedown, while the placements shown in this exhibit are included when reported, frequently with little or no information concerning timing of takedowns. Full or partial takedowns may take place both prior and subsequent to the date a placement is reported. \*-Included in table for first time.
