January 13, 1964.

CAPITAL MARKETS DEVELOPMENTS  
IN THE UNITED STATES

Public security financing to obtain new capital was in substantial volume last week and will be about as large this week. Last week, ended January 10, two large corporate issues with gross proceeds of \$170 million and two State and local government bond issues amounting to \$95 million were sold. This week, ending January 17, a \$40 million corporate issue and four large municipal issues with par value of \$184 million are on the calendar to obtain new capital. In addition the Kansas Turnpike Authority has scheduled a \$19 million bond offering to obtain funds for the refunding of outstanding securities.

Bond yields. Yields on seasoned long-term bonds either rose slightly or were stable last week. U. S. Government bond yields edged up a basis point to 4.16 per cent, matching their late 1963 peak which was the highest level since the spring of 1960; Baa-rated State and local government bond yields also increased a basis point to 3.57 per cent. Yields on seasoned corporate bonds and on Aaa-rated municipal bonds, however, were unchanged.

Yields on new corporate bonds, adjusted to an Aaa basis, averaged 4.50 per cent last week; five basis points higher than in mid-December, when the more recent representative offering was made.

Short- and intermediate-term interest rates. Rates on 3-month and 6-month Treasury bills increased a basis point each last week to 3.53 and 3.66 per cent, respectively. Yields on 3-5 year U. S. Government obligations, however, which had risen for five consecutive weeks, were stable at 4.08 per cent, the highest level since June 1960. The average effective Federal funds rate increased six basis points to 3.50 per cent. Other rates were unchanged.

Mortgage recordings. Seasonally adjusted nonfarm mortgage recordings of \$20,000 or less edged off in September, the latest month available on a three-month moving average. The monthly rate of \$3,189 million was still the second highest on record and nearly a tenth above a year earlier.

Conventional mortgages accounted for 75 per cent of the total amount recorded in October, based on the unadjusted data. This proportion compared with 74 per cent a year earlier and 73 per cent in October 1959.

The average size of mortgage recorded in October was \$9,506. This was little changed from September and moderately less than the record average size in August.

Stock prices. Common stock prices advanced moderately further on balance last week in active trading. Prices, as measured by Standard and Poor's composite index of 500 stocks, rose one per cent to close at 76.24 on January 10, only slightly below the peak reached the previous day. Trading volume averaged 5.4 million shares a day, the same as a week earlier.

More detailed information concerning recent capital market developments is presented in the attached exhibits.

Capital Markets Section,  
Division of Research and Statistics,  
Board of Governors of the Federal Reserve System.

Dec. 13	4.50	4.50	3.84	3.15	.34
Dec. 20	4.50	4.50	3.88	3.50	.35
Dec. 27	4.50	4.50	3.88	3.50	.36
Jan. 3	4.50	4.50	3.88	3.44	.36
Jan. 10 p/	4.50	4.50	3.88	3.50	.35

1/ Weekly rate shown is that in effect at end of period. Stock Exchange call loan rate is going rate on call loans secured by customers' stock exchange collateral at New York City banks. Prime rate is that charged by large banks on short-term loans to business borrowers of the highest credit standing.

2/ Average of daily rates published by finance companies for directly placed paper for varying maturities in the 90-179 day range.

3/ Weekly average of daily effective rate, which is the rate for the heaviest volume of purchase and sale transactions as reported to the Federal Reserve Bank of New York.

Note.—Highs and lows are for individual series and may be on different dates for different series. For spreads, high refers to widest, and low to narrowest.

## STOCK MARKET

Jan. 10 p/	76.24	3.06	5.4	n.a.	n.a.	n.a.

n.a.—Not available. p/ Preliminary.

1/ Standard and Poor's composite index of 500 common stocks, weekly closing prices, 1941-43-10. Monthly data are averages of daily figures rather than of Friday's only. Highs and lows are for Friday's data only.

2/ Standard and Poor's composite stock yield based on Wednesday data converted to weekly closing prices by Federal Reserve. Yields shown are for dates on which price index reached its high or low.

3/ Averages of daily trading volume on the New York Stock Exchange.

End of month figures for member firms of the New York Stock Exchange which carry margin accounts; excludes balances secured by U. S. Government obligations.

5/ Wednesday figures for weekly reporting member banks. Excludes loans for purchasing or carrying U. S. Government securities. Prior to July 1, 1959, such loans are excluded only at banks in New York and Chicago. Weekly reporting banks account for about 70 per cent of loans to others.

For further detail see Bulletin.

n.a.—Not available.

<sup>1/</sup> Total recordings data are estimates based on reports from about 450 areas and include mortgages of \$20,000 or less secured by nonfarm real estate, primarily residential properties. FHA-insured loans represent gross amount of insurance written, and VA-guaranteed loans the gross amount of loans closed, on 1-4 family houses. Other recordings data are derived as a residual, although total recordings and VA and FHA loans are not strictly comparable in concept or timing.

<sup>2/</sup> Three-month moving average, seasonally adjusted by Federal Reserve.  
<sup>3/</sup> This index relates the average size of mortgage recordings for each month (total dollar recordings divided by number of mortgage recordings) to the average size during 1959.

Source.—Federal Home Loan Bank Board, Federal Housing Administration and Veterans Administration.

Notes: Averages of offering yields on all new issues of publicly offered corporate bonds rated Aaa, Aa and A by Moody's Investors Service (except serial and convertibles issues, offerings of natural gas pipelines and foreign companies, and bonds guaranteed by the Federal Government) weighted by size of offering. Before averaging, new offerings are adjusted to a composite Aaa basis by deducting from the actual offering yield the excess of the weekly average yield for seasoned bonds of the appropriate industry-quality group over the composite average for seasoned Aaa-rated bonds (Moody's). Averages considered unrepresentative because of special characteristics of the offerings included are denoted by an asterisk.

p/ Preliminary. e/ Estimated by Federal Reserve. n.a.--Not available. 1/ These data differ from those in Exhibit H in that refunding issues, as well as new capital issues are included. Long-term securities are defined as those maturing in more than one year.

2/ Includes securities offered in the United States by foreign governments and their political subdivisions and international organizations. Source: Securities and Exchange Commission. 3/ Issues not guaranteed by the U. S. Government. Source: long-term, Securities and Exchange Commission; short-term, Treasury Department and Federal Reserve.

4/ These data differ from those in Exhibit H and above in that they represent new offerings less retirements, whether from the proceeds of refunding issues or from other funds. Data include only issues with original maturity of one year or less. 5/ Principally tax and bond-anticipation notes, warrants or certificates and Public Housing Authority notes. In some instances PHA notes included may have a somewhat longer maturity than one year. Source: Bond Buyer and Federal Reserve.

2/ Includes foreign government and International Bank for Reconstruction and Development issues and non-guaranteed issues of Federal agencies.

Note.--Deletions for reasons other than sale of issue: None.

Exhibit M

Foreign Government and Corporate Security Offerings  
and Placements in the United States

Part I: Public Offerings

Sale Date	Amount (millions of dollars)	Issuer and Description of Issue
A. Sold November 1 through January 10		
12/24	3.0	Province of Santa Fe, Republic of Argentina - 7% Treasury bonds, maturing 1969, offered to yield 9.45%
B. Prospective Offerings		
2/27	7.5	Tubos de Acero de Mexico, S.A. - convertible debenture

## Part II: Private Placement--Reported November 1 through January 10-

Date reported	Amount (millions of dollars)	Issuer and Description of Issue
11/27	15.0	Home Oil Co., Ltd.--6-1/4% collateral trust bonds, maturing 1983, placed at par--no information available on takedown
*1/7	14.0	Laurentide Financial Corp., Ltd.--5-1/4% collateral trust notes, maturing 1989--no information available on takedown

Note: For retrospective data on aggregate foreign corporate and government security offerings in the United States see Exhibits I and J. There is no simple relationship between the data shown in this Exhibit and that shown in Exhibits I and J because the latter includes privately placed securities in the period in which funds are actually takedown but only in the amount of takedown, while the placements shown in this exhibit are included when reported, frequently with little or no information concerning timing of takedowns. Full or partial takedowns may take place both prior and subsequent to the date a placement is reported.

\*1/7 included in table for first time.
