

H.14

April 20, 1964.

CAPITAL MARKET DEVELOPMENTS
IN THE UNITED STATES

Public security financing to obtain new capital was in light volume last week, but will be very substantial this week. Last week, ended April 17, no large corporate issues were offered, but six large State and local government bond issues with par value of \$83 million were sold. This week, ending April 25, three large corporate issues with gross proceeds of \$165 million and three large State and local issues amounting to \$224 million are expected.

Bond yields. Yields on Aaa-rated State and local government bonds dropped four basis points last week to 3.11 per cent. Yields on other seasoned, long-term bonds were stable.

Short- and intermediate-term interest rates. Yields on Treasury bills and on 3-5 year U. S. Government obligation eased further last week. Rates on 3-month bills edged off a basis point to 3.47 per cent, their lowest level since early last November, while 6-month bill rates fell two basis points to 3.67 per cent; yields on intermediate-term Treasury obligations declined a basis point to 4.18 per cent. Reflecting the full effect of the change in rates announced the previous week, the average rate on directly-placed finance company paper with 90-179 day maturity fell eight basis points to 3.75 per cent. The average effective Federal funds rate, on the other hand, went back to 3.50 per cent. Other rates were unchanged.

Stock market credit. Total customers' credit in the stock market increased \$21 million during March to \$7.1 billion at month-end. All of this rise was accounted for by an increase of \$39 million in weekly reporting member bank loans to others than brokers and dealers for purchasing or carrying securities (except U. S. Government securities). Customers' net debit balances (except those on U. S. Governments) fell \$18 million further during the month.

Money borrowed on customers' collateral by member firms of the New York Stock Exchange fell \$99 million in March, the fourth consecutive month-to-month decline. Free credit balances, however, rose \$32 million. More detailed information on stock market credit in recent months is shown in the table on page 11.

Mortgage yields and conventional mortgage rates. Secondary market yields on 25-year, 5-1/4 per cent, FHA-insured mortgages in March remained at the average of 5.44 per cent which, with minor exceptions has prevailed since April of last year. In March of 1963, when yields were still declining, the average was 5.47 per cent.

Contract interest rates for conventional first mortgages also continued to show no change in March. For new home loans, the average of 5.80 per cent has been virtually the same since April of 1963. For existing home loans, the average of 5.85 per cent has been maintained since last May.

Stock prices. Common stock prices, as measured by Standard and Poor's composite index of 500 stocks, advanced moderately last week to a new peak of 80.55 on April 17. Trading volume averaged 5.4 million shares a day, off slightly from the average for the previous week.

More detailed information concerning recent capital market developments is presented in the attached exhibits.

Capital Markets Section,
Division of Research and Statistics,
Board of Governors of the Federal Reserve System.

Mar. 1/	21	--	-18	--	39	-15	-99	79	32

Note: With the exception of bank loan data, figures are reported to the New York Stock Exchange by member firms carrying margin accounts. Bank loans to others than brokers and dealers for purchasing and carrying securities are for weekly reporting member banks. Net debit balances and customer free credit balances are as of the end of the month; bank loans and money borrowed are reported for the last Wednesday of the month. Numbers in parenthesis denote month of year.

1/ November 1963 data on customers' net debit balances do not include accounts carried by a large former member firm in liquidation; most of these accounts have been transferred to other member firms and are reported in their debit figures for the month received (some in December, more in January 1964). Debit balance totals for the period from October 1963 through January 1964, therefore, are not completely comparable.

Mar. 27	4.50	4.50	3.88	3.46	.34
Apr. 3	4.50	4.50	3.93	3.50	.41
Apr. 10	4.50	4.50	3.83	3.42	.35
Apr. 17 ^{p/}	4.50	4.50	3.75	3.50	.28

^{1/} Weekly rate shown is that in effect at end of period. Stock Exchange call loan rate is going rate on call loans secured by customers' stock exchange collateral at New York City banks. Prime rate is that charged by large banks on short-term loans to business borrowers of the highest credit standing.

^{2/} Average of daily rates published by finance companies for directly placed paper for varying maturities in the 90-179 day range.

^{3/} Weekly average of daily effective rate, which is the rate for the heaviest volume of purchase and sale transactions as reported to the Federal Reserve Bank of New York.

Notes: Highs and lows are for individual series and may be on different dates for different series.

For spreads, high refers to widest, and low to narrowest.

				New ^{4/}	Seasoned ^{5/}	FHA mtgs.	Seasoned bds.
1956 - Low	4.68	5.20	.47	3.08	3.08	.76	--
1957 - High	5.63	6.00	.47	4.94	4.12	1.58	1.03
1958 - Low	5.35	5.55	.15	3.65	3.57	.88	.05
1959-60 - High	6.24	6.30	.23	5.25	4.61	1.69	.73
1962-63 - High	5.72	5.95	.38	4.72	4.45	1.50	.39
Low	5.43	5.80	.23	4.12	4.22	.95	-.16
1963 - December	5.44	5.80	.36	4.49	4.35	.95	.14
1964 - January	5.44	5.80	.36	4.50	4.37	.94	.13
February	5.44	5.80	.36	4.38	4.36	1.06	.02
March	5.44	5.80	.36	4.43	4.38	1.01	.05

^{1/} Neither mortgage nor bond yields take into account servicing costs which are much higher for mortgages than bonds. Generally, bonds pay interest semi-annually; mortgages, monthly. Mortgage yields, if computed as equivalent to a semi-annual interest investment, would be slightly higher than given in the table.

^{2/} Based on FHA field-office opinions about average bid prices in the private secondary market for new-home mortgages for immediate delivery. Data relate only to 25-year mortgages with down payments of 10 per cent or more, weighted by probable volume of transactions. Yields computed by FRB, assuming 25-year mortgages are paid off in 12 years. Dashed lines indicate periods of adjustment to changes in the contractual interest rate.

^{3/} Based on FHA field office opinion on typical interest rates (rounded) on conventional first mortgages prevailing in the market areas of insuring office cities. Beginning with April 1960, rate relates only to new-home mortgages; prior to that date, rate related to both new as well as existing-home mortgages. Dashed line indicates this change in the series.

^{4/} See note for Exhibit G.

^{5/} Moody's Investor Service. Monthly averages of daily data. See Exhibit A.

Note: Averages of offering yields on all new issues of publicly offered corporate bonds rated Aaa, Aa and A by Moody's Investors Service (except serial and convertible issues, offerings of natural gas pipeline and foreign companies, and bonds guaranteed by the Federal Government), weighted by date of offering. Before averaging, new offerings are adjusted to a composite Aaa basis by deducting from the actual offering yield the excess of the weekly average yield for seasoned bonds of the appropriate industry-quality group over the composite average for seasoned Aaa-rated bonds (Moody's). Averages considered unrepresentative because of special characteristics of the offerings included are denoted by an asterisk.

p/ Preliminary. e/ Estimated by Federal Reserve. n.a.--Not available. 1/ These data differ from those in Exhibit H in that refunding issues, as well as new capital issues are included. Long-term securities are defined as those maturing in more than one year. 2/ Includes securities offered in the United States by foreign governments and their political subdivisions and international organizations. Source: Securities and Exchange Commission. 3/ Issues not guaranteed by the U. S. Government. Source: long-term, Securities and Exchange Commission; short-term, Treasury Department and Federal Reserve. 4/ These data differ from those in Exhibit H and above in that they represent new offerings less retirements, whether from the proceeds of refunding issues or from other funds. Data include only issues with original maturity of one year or less. 5/ Principally tax and bond anticipation notes, warrants or certificates and Public Housing Authority notes. In some instances PHA notes included may have a somewhat longer maturity than one year. Source: Bond Buyer and Federal Reserve.

 Note.--Deletions for reasons other than sale of issue: None.

Exhibit M

Foreign Government and Corporate Security Offerings
and Placements in the United States

Part I: Public Offerings

Sale Date	Amount (millions of dollars)	Issuer and Description of Issue
		A. Sold January 1 through April 17
2/6	8.0	Tubos de Acero de Mexico, S.A. - 7% convertible debenture, maturing 1970, offered to yield 7.00%
3/23	50.0	Inter-American Development Bank-4½ bonds, maturing 1984, offered to yield 4.50%
4/1	25.0	United Mexican States--6-1/2% sinking fund debentures, offered to yield 6.75%

B. Prospective Offerings

None

Part II: Private Placement--Reported February 1 through April 7

Date reported	Amount (millions of dollars)	Issuer and Description of Issue
2/3	28.0	Manitoba Hydro-Electric Board--4-1/4% debentures, maturing 1986--no information available on takedown
2/3	5.0	Scottish United Investors, Ltd.--5% notes, maturing 1969-79--no information available on takedown
2/10	8.0	British American Construction Co.--promissory notes, maturing 1979--no information available on takedown
2/10	4.0	British Assets Trust Ltd. (Scotland)--5% notes, maturing 1981--takedown in February
4/1	12.5	C. Itoh & Co., Ltd--6-1/2% convertible unsecured debentures, maturing 1984--no information available on takedown.

Note: For retrospective data on aggregate foreign corporate and government security offerings in the United States see Exhibits I and J. There is no simple relationship between the data shown in this Exhibit and that shown in Exhibits I and J because the latter includes privately placed securities in the period in which funds are actually takedown but only in the amount of takedown, while the placements shown in this exhibit are included when reported, frequently with little or no information concerning timing of takedowns. Full or partial takedowns may take place both prior and subsequent to the date a placement is reported.

*--Included in table for first time.
