**CAPITAL MARKET DEVELOPMENTS  
IN THE UNITED STATES**

Public security financing to obtain new capital was in very substantial volume last week, but will be in somewhat more moderate volume this week. Last week, ended May 8, two large corporate issues aggregating \$150 million, four large State and local government bond issues with par value of \$155 million and a \$15 million bond issue of the Republic of Finland were sold to obtain new capital. In addition, the New York State Dormitory Authority sold \$21 million in bonds to refund outstanding securities. This week, ending May 15, three large corporate issues totaling \$94 million and seven large State and local bond issues amounting to \$86 million are on the calendar.

Bond yields. Changes in yields on seasoned, long-term bonds were mixed but minor last week. Yields on Baa-rated corporate bonds edged up a basis point to 4.86 per cent, but those of lower-grade municipal bonds dropped two basis points to 3.50 per cent and U. S. Government bond yields eased a basis point to 4.18 per cent. Aaa-rated corporate and State and local government bond yields were unchanged.

Yields on new offerings of corporate bonds, adjusted to an Aaa basis, rose eight basis points last week to 4.53 per cent, the highest level since early 1962. This increase reflected in part the sizable volume of new bonds scheduled for public offering in the near future.

Short- and intermediate-term interest rates. Last week rates on Treasury bills reversed their downward trend of recent weeks and advanced, but yields on 3-5 year U. S. Government obligations fell further. Rates on 3-month and 6-month bills rose four and three basis points, respectively, to 3.49 and 3.63 per cent; yields on intermediate-term Treasury obligations, however, dropped four basis points to 4.10 per cent. The average effective Federal funds rate returned to 3.50 per cent. Other rates were unchanged.

Common stock prices. Common stock prices, as measured by Standard and Poor's composite index of 500 stocks, advanced one per cent on balance last week to close at 81.00 on May 8, somewhat below the all-time peak reached the previous day. Trading volume averaged 5.4 million shares a day, about the same as a week earlier.

More detailed information concerning recent capital market developments is presented in the attached exhibits.

<sup>1/</sup> Neither mortgage nor bond yields take into account servicing costs which are much higher for mortgages than bonds. Generally, bonds pay interest semi-annually; mortgages, monthly. Mortgage yields, if computed as equivalent to a semi-annual interest investment, would be slightly higher than given in the table.

<sup>2/</sup> Based on FHA field-office opinions about average bid prices in the private secondary market for new-home mortgages for immediate delivery. Data relate only to 25-year mortgages with down payments of 10 per cent or more, weighted by probable volume of transactions. Yields computed by FRB, assuming 25-year mortgages are paid off in 12 years. Dashed lines indicate periods of adjustment to changes in the contractual interest rate.

<sup>3/</sup> Based on FHA field office opinion on typical interest rates (rounded) on conventional first mortgages prevailing in the market areas of insuring office cities. Beginning with April 1960, rate relates only to new-home mortgages; prior to that date, rate related to both new as well as existing-home mortgages. Dashed line indicates this change in the series.

<sup>4/</sup> See note for Exhibit G.

<sup>5/</sup> Moody's Investor Service. Monthly averages of daily data. See Exhibit A.

Note: Averages of offering yields on all new issues of publicly offered corporate bonds rated Aaa, Aa and A by Moody's Investors Service (except serial and convertible issues, offerings of natural gas pipeline and foreign companies, and bonds guaranteed by the Federal Government) weighted by size of offering. Before averaging, new offerings are adjusted to a composite Aaa basis by deducting from the actual offering yield the excess of the weekly average yield for seasoned bonds of the appropriate industry-quality group over the composite average for seasoned Aaa-rated bonds (Moody's). Averages considered unrepresentative because of special characteristics of the offerings included are denoted by an asterisk.

## Part II: Private Placement--Reported March 1 through May 8

Date reported	Amount (millions of dollars)	Issuer and Description of Issue
4/1	12.5	C. Itoh & Co. Ltd--6-1/2% convertible unsecured debentures, maturing 1984--no information available on takedown.
* 5/8	4.0	Israel Discount Bank Ltd.--5-1/2% capital notes, maturing 1979--no information available on takedown.
* 5/8	10.0	Pacific Great Eastern Railroad Co.--4-1/2% sinking fund debentures, maturing 1994--no information available on takedown

Note: For retrospective data on aggregate foreign corporate and government security offerings in the United States see Exhibit I and J. There is no simple relationship between the data shown in this Exhibit and that shown in Exhibits I and J because the latter includes privately placed securities in the period in which funds are actually takedown but only in the amount of takedown, while the placements shown in this exhibit are included when reported, frequently with little or no information concerning timing of takedowns. Full or partial takedowns may take place both prior and subsequent to the data a placement is reported.

\*--Included in table for first time.
