**CAPITAL MARKET DEVELOPMENTS**  
**IN THE UNITED STATES**

Corporate and municipal bond markets. Public security financing by corporations this week will be in about the same moderate volume as a week earlier, with most of the total accounted for by a \$60 million debenture offering of the New England Telephone and Telegraph Company. The new supply of municipal bonds, on the other hand, will be very substantial and about one-third larger than last week; the largest issue on the calendar for offering this week is \$70 million in bonds of the San Francisco Bay Area Transit Authority.

1/ Federal Reserve estimates based on published reports of issues sold and scheduled for offering; corporate rights offering are included as of the date subscription rights expire.

The limited supply of new corporate bonds reaching the market last week was well received, and there was little net change in yields on recently distributed issues. In the municipal market, with the satisfactory reception afforded the \$120 million State of California bonds; about three-fifths of last week's new supply of municipals was spoken for by the week's end. Moreover, dealers appear to have made further headway in reducing their large advertised inventories of unsold securities.

<sup>1/</sup> Neither mortgage nor bond yields take into account servicing costs which are much higher for mortgages than bonds. Generally, bonds pay interest semi-annually; mortgages, monthly. Mortgage yields, if computed as equivalent to a semi-annual interest investment, would be slightly higher than given in the table.

<sup>2/</sup> Based on FHA-field-office opinions about average bid prices in the private secondary market for new-home mortgages for immediate delivery. Separate data available for 25-year and beginning July 1961--30-year mortgages with minimum downpayments, weighted by probable volume of transactions. Yields computed by FHA, assuming prepayment period of 12 years for 25-year mortgages and 15 years for 30-year mortgages. Over the period for which they can be compared, the movement of the two mortgage yield series has been similar. Dashed lines indicate periods of adjustment to changes in contractual interest rates.

<sup>3/</sup> Based on FHA field office opinion on typical interest rates (rounded) on conventional first mortgages prevailing in the market areas of insuring office cities. Beginning with April 1960, rate relates only to new-home mortgages; prior to that date, rate related to both new as well as existing-home mortgages. Dashed line indicates this change in the series.

Note: Averages of offering yields on all new issues of publicly offered corporate bonds rated Aaa, Aa and A by Moody's Investors Service (except serial and convertible issues, offerings of natural gas pipeline and foreign companies, and bonds guaranteed by the Federal Government) weighted by size of offering. Before averaging, new offerings are adjusted to a composite Aaa basis by deducting from the actual offering yield the excess of the weekly average yield for seasoned bonds of the appropriate industry-quality group over the composite average for seasoned Aaa-rated bonds (Moody's). Averages considered unrepresentative because of special characteristics of the offerings included are denoted by an asterisk.

## Part II: Private Placement--Reported May 1 through July 9

Date reported	Amount (millions of dollars)	Issuer and Description of Issue
5/26	25.0	City of Montreal--5% sinking fund debentures, maturing 1985-90--no information available on takedown.
5/28	30.0	Trans-Canada Pipe Lines Ltd.--5-1/4% first mortgage bonds, maturing 1985, placed to yield 5.09%--no information available on takedown.

Note: For retrospective data on aggregate foreign corporate and government security offerings in the United States see Exhibits I and J. There is no simple relationship between the data shown in the Exhibit and that shown in Exhibits I and J because the latter includes privately placed securities in the period in which funds are actually taken down but only in the amount of takedown, while the placements shown in this exhibit are included when reported, frequently with little or no information concerning timing of takedowns. Full or partial takedowns may take place both prior and subsequent to the date a placement is reported.

\*--Included in table for first time.
