CAPITAL MARKET DEVELOPMENTS
IN THE UNITED STATES

Corporate and municipal bond markets. The calendar in both corporate and municipal markets is relatively light this week--substantially below the weekly average over the past 52 weeks. Southern California Edison Company's \$75 million mid-week debt offering dominates new issues in the corporate market.

1/ Federal Reserve estimates based upon published reports of issues sold and scheduled for offering; corporate rights offerings are included as of the date subscription rights expire.

Underwriters successfully offered a large industrial issue last week, but the major new utility issue was poorly received by investors. Syndicate price restrictions were terminated on two slow moving issues, and free market trading resulted in upward yield adjustments of 4 basis points.

Municipal yields advanced 2 to 3 basis points last week--the fourth consecutive weekly increase in municipal yields. Dealers cut prices on some older issues while over two-thirds of last week's new offerings were spoken for by week-end.

Stock prices. Stock prices declined sharply last week in very active trading. Standard and Poor's index of 500 stocks closed at 87.84--down 3.22 from the prior week. Trading volume averaged a heavy 9.6 million shares a day.

1/ Data represent unpaid principal balances of the mortgages involved, exclusive of premiums, discounts, or other charges. Offerings are amounts of applications received during the period from sellers proposing that FNMA execute purchasing contracts. An immediate purchase contract covers existing mortgages which the seller must deliver to FNMA within 45 days. A standby commitment contract relates to proposed mortgages on housing not yet under construction which the seller must usually deliver within one year. Purchases include those under both immediate purchases and standby commitment contracts. Data exclude FNMA activity under Special Assistance and Management and Liquidating Programs.

Notes: Averages of offering yields on all new issues of publicly offered corporate bonds rated Aaa, Aa and A by Moody's Investors Service (except serial and convertible issues, offerings of natural gas pipeline and foreign companies, and bonds guaranteed by the Federal Government) weighted by size of offering. Before averaging, new offerings are adjusted to a composite Aaa basis by deducting from the actual reoffering yield the excess of the weekly average yield for seasoned bonds of the appropriate industry-quality group over the composite average for seasoned Aaa-rated bonds (Moody's). Averages considered unrepresentative because of special characteristics of the offerings included are denoted by an asterisk.

Note: For retrospective data on aggregate foreign corporate and government security offerings in the United States see Exhibits I and J. There is no simple relationship between the data shown in the Exhibit and that shown in Exhibits I and J because the latter includes privately placed securities in the period in which funds are actually takedown but only in the amount of takedown while the placements shown in this exhibit are included when reported, frequently with little or no information concerning timing of takedowns. Full or partial takedowns may take place both prior and subsequent to the date a placement is reported.
