

CAPITAL MARKETS DEVELOPMENTS
IN THE UNITED STATES

Corporate and municipal bond markets. Public security offerings by corporations this week will aggregate approximately one-third more than the weekly average for such issues over the past year. A \$71 million common stock rights offering by United Airlines accounts for nearly one-third of the total. Municipal issues for new capital will be in moderate volume during this holiday-shortened week.

1/ Federal Reserve estimates based upon published reports of issues sold and scheduled for offering; Corporate rights offerings are included as of the date subscription rights expire.

Yields on both new and seasoned corporate bonds advanced further last week. Investors responded enthusiastically to last week's single, major debt issue--as indicated by a single day sell-out. Price restrictions were terminated on two slow-moving issues in syndicate, and free market trading led to upward yield adjustments of 5-7 basis points.

Municipal yields on prime quality bonds advanced 5-6 basis points. Investors' response to last week's new issues was lukewarm and a large portion of these issues remain in dealers' inventories.

FNMA Secondary Market Operations. Purchases of mortgages in the secondary market by the Federal National Mortgage Association declined to \$193.0 million in April. While the volume was still unusually large, it was the smallest since last December and compared with a record \$301.4 million reached in March.

Offerings of eligible mortgages, which had begun to expand again in March, also contracted to \$193.0 million in April. This was the smallest amount of offerings since last September. In January, they has soared to \$333.2 million.

Sales by FNMA continued nil for the third successive month Over the whole period since last July such sales have aggregated no more than \$5.6 million.

A major factor in the smaller volume of FNMA purchasing activity since March has been restriction, effective April 2, of eligible mortgages to those with an outstanding loan amount of \$15,000 or less per dwelling unit mortgaged. A further reduction in prices by 2 percentage points, effective April 12, has also been a limiting influence.

Savings Flows. Savings Flows at depositary-type savings institutions totaled \$271 million during April. All of this gain was due to a net increase of \$1,360 million in time and savings deposits at commercial banks. Savings and loan associations and mutual savings banks experienced a net outflow aggregating almost \$1.1 billion--much greater than the usual April decline in savings flows for these institutions.

More information on savings flows can be found on page 4.

Stock Prices. Common stock prices last week scored their second consecutive weekly gain in relatively light trading volume. Standard and Poor's index of 500 stocks closed at 86.89--2.17 higher than the prior week. Trading volume averaged 6.2 million shares per day.

1/ Data represent unpaid principal balances of the mortgages involved, exclusive of premiums, discounts, or other charges. Offerings are amounts of applications received during the period from sellers proposing that FNMA execute purchasing contracts. An immediate purchase contract covers existing mortgages which the seller must deliver to FNMA within 45 days. A standby commitment contract relates to proposed mortgages on housing not yet under construction which the seller must usually deliver within one year. Purchases include those under both immediate purchases and standby commitment contracts. Data exclude FNMA activity under Special Assistance and Management and Liquidating Programs.

Note: For retrospective data on aggregate foreign corporate and government security offerings in the United States see Exhibits I and J. There is no simple relationship between the data shown in the Exhibit and that shown in Exhibits I and J because the latter includes privately placed securities in the period in which funds are actually takedown but only in the amount of takedown while the placements shown in this exhibit are included when reported, frequently with little or no information concerning timing of takedowns. Full or partial takedowns may take place both prior and subsequent to the date a placement is reported.
