CAPITAL MARKETS DEVELOPMENTS IN THE UNITED STATES

Corporate and municipal bond markets. New security issues of corporations will be unusually large this week, aggregating more than twice the average volume for such issues over the past year. The majority of these issues will be convertible debentures, however, with two offerings accounting for about one-half of the total volume-and Alcoa (\$125 million) and Boeing Co. (\$130 million rights offering). This week's municipal offerings will also be above-average and will feature a \$119 million Public Housing Authority bond issue.

Long-term Public Security Offerings $\underline{1}/$ (In millions of dollars)

Sept. 2 Sept. 9	225 65		130 140	
Scheduled:				
Sept. 16	445		280	

1/ Federal Reserve estimates are based upon published reports of issues sold and scheduled for offering; corporate rights offerings are included as of the date subscription rights expire.

New issue yields declined 7 basis points last week, which the lagging seasoned corporate yield series continued to advance. Investors responded enthusiastically to the week's largest offering, a \$50 million telephone issue offered at a yield of 5.95 per cent.

Municipal yields declined last week to mark the first weekly yield decline since late June. Advertised inventories of municipal dealers (at 252 million) fell to a six year low.

Stock prices. Common stock prices--as measured by Standard and Poor's composite index of 500 stocks--declined in the holiday-shortened past week. The 500 stock index registered 76.29 on Friday, or 1.13 points below the week earlier level. Trading volume averaged 5.5 million shares a day.

More detailed information concerning recent capital market developments can be found in the attached exhibits.

Capital Markets Section, Division of Research and Statistics, Board of Governors of the Federal Reserve System.

Seither mortgage nor bond yields take into account servicing costs which are much higher for mortgages than bonds. Generally, bonds pay interest semi-annually; mortgages, monthly. Mortgage yields, if computed as equivalent to a semi-annual interest investment, would be slightly higher than given in the table.

the table.

Based on File field office opinions about average hid prices in the private secondary market for new-home mortiages for immediate delivery. Separate data available for 25-year and—beginning July 1001—30-year mortiages with minima dempayment, weighted by probable volume of transactions. Tables computed by File, assuming prepayment period of 12 years for 25-year mortiages and 15 years for 30-year mortiages. Over the period for which they can be compared, the novement of the two mortiage yield series has been similar. Dashed lines indicate periods of adjustment to changes in centractual interest rates.

| Based on File field office spinion on typical interest rates (rounded) on conventional first mortiages prevailing in the market areas of incuring office cities. Beginning with april 100, rate relates only to now-home mortiages; prior to that date, rate related to both new as well as existing-home mortiages. Dashed line indicates this change in the series.

| File mortiage yield date are for 25-year mortiages through June 1001; 30-year mortiages thereafter, See note for Ethibit G.
| Moody's Investor Service. Morthly averages of daily date. See Ethibit A.

Compiled by Federal Home Loan Bank Board in cooperation with Federal Deposit Insurance Corporation. Data are weighted averages based on probability sample survey of characteristics of conventional first nortigage originated by major institutional leader groups, (including mortage commanies) for purchase of contraction leads to home-builders; and—in this exhibit—permanent leads which are coupled with construction leads to home-builders; and—in this exhibit—permanent leads which are coupled with construction loans to conser-builders. Data are still in a developmental stage and may reflect essence influences which cannot yet be measured because the series go back only to end of 1962, Related series on conventional mortages rates only, based on unweighted opinions of regional-office directors of the Federal Housing Administration, are available somewhat sooner than the results of FRIERS-FDIC survey, and are included—in the case of new home mortage rates—in Exhibit F, Parts I

Jees and charges—expressed as a percentage of the principal mortgage rates—in Exhibit F, Farts I

2/ fees and charges—expressed as a percentage of the principal mortgage amount—include loan commissions,
fees, discounts, and other charges which provide added income and are paid by the
Digitized for Francisms. They exclude any closing costs related solely to transfer of property ownership.

Note: Averages of offering yields on all new issues of publicly offered corporate bonds rated Aas, Aa and
A by Moody's Investors Service (except sortal and convertible issue, offerings of natural gas pipeline
and foreign companies, and bonds guaranteed by the Federal Government) weighted by its of offerings.
Before averaging, new offerings are adjusted to a composite iaas basis by deducting from the actual
reoffering yield the access of the weekly average yield for seasoned bunks of the appropriate industry—
quality group over the composite average for seasoned Aas—rated bunks (Moody's). Averages considered
unrepresentative because of speedal characteristics of the offerings included are denoted by an asterisk.

p/ Preliminary. e/ Estimated by Federal Reserve. n.a.--Not available. 1/ These data differ from those in Exhibit H in that refunding issues, as well as new capital issues, are included. Long-term securities are defined as those maturing in more than one year. 2/ Includes securities offered in the U.S. by foreign governments and their political subdivisions and international organizations. Source: Securities and Exchange Commission. 3/ Issues not guaranteed by U.S. Government. Source: Long-term, Securities and Exchange Commission; short-term, Treasury Dept. & Fed. Reserve. 4/ These data differ from those in Exhibit H and above in that they represent new offerings less retirements, whether from the proceeds or refunding issues or from other funds. Data include only issues with original maturity of one year or less. 5/ Principally tax and bond anticipation notes. warrants, or certificates and Public Housing Auth. notes. In some instances PHA notes included may have a somewhat longer maturity than 1 year. Source: Bond Buyer & Federal Reserve.

Exhibit M

Foreign Government and Corporate Security Offerings and Placements in the United States

Part I: Public Offerings

Sale Date	Amount (millions of dollars)	Issuer and Description of Issue
		A. Sold July 1 through September 9
7/7	15.0	Govt. of Mexico6-7/8% bonds, maturing 1981, reoffered to yield 7.26%.

B. Prospective Offerings

20.0 Republic of Ireland -- bonds Indefinite 15.0 Nippon Telegraph and Telephone Public Corp -- bonds Indefinite

^{*--}Included in table for first time.

^{**--}Issue sold to investors outside of U.S.

^{***--}Issues subject to interest equalization tax.

Part II: Private Placements - Reported July 1 through September 9

Date Reported	Amount (millions of dollars)	Issuer and Description of Issue
7/6	31.0	Steep Rock Iron Mines, Ltd6% 1st mtg. bds., maturing 1987no information available on takedown.
7/26	50.0	Great Canadian Oil Sands, Ltd % notes, maturing 1991no informátion available on takedown.

Note: For retrospective data on aggregate foreign corporate and government security offerings in the United States see Exhibits I and J. There is no simple relationship between the data shown in the Exhibit and that shown in Exhibits I and J because the latter includes privately placed securities in the period in which funds are actually taken down but only in the amount of takedown while the placements shown in this exhibit are included when reported, frequently with little or no information concerning timing of takedown. Full or partial takedowns may take place both prior and subsequent to the date a placement: is reported.
