

October 10, 1966.

CAPITAL MARKETS DEVELOPMENTS
IN THE UNITED STATES

Corporate and municipal bond markets. The expected volume of new corporate and municipal security offerings this week will approximate the average volume for such issues over the past year. Accounting for nearly one-third of the corporate volume is the convertible debenture offering to stockholders by United Aircraft Corporation. The largest municipal offering, Los Angeles County Flood Control District's \$55 million general obligation issue, represents more than one-fourth of the municipal volume.

Oct. 7	100	--	144	--
Scheduled:				
Oct. 14	190	--	204	--

1/ Federal Reserve estimates are based upon published reports of issues sold and scheduled for offering; corporate rights offerings are included as of the date subscription rights expire.

New and seasonal corporate bond yields declined further last week. The sole straight debt issue offered last week -- Columbia Gas System's \$40 million of single A-rated debentures -- was moderately well received by investors at an initial yield of 6.19 per cent. This issue did not carry any special provisions against early redemption by the company, thus the new issue yield series cannot be directly compared to the prior week when all four issues included had five-year call protection.

Municipal yields declined 1 to 2 basis points for the second consecutive week. New issue bidding by underwriters was rather aggressive, but investors responded unenthusiastically to the lower new issue yields -- about one-half of the new issues remained unsold at the close of trading on Friday.

Stock prices. Common stocks prices declined substantially last week in trading that averaged 7.5 million shares a day. Standard and Poor's index of 500 stocks ended the week at 73.20 -- a drop of 3.36 points from the week earlier. Stock prices registered a new low for the year, 1.33 points below the previous low marked in late August, and now stand at their lowest level since October 1963.

1/ Standard and Poor's composite index of 500 common stocks, weekly closing prices, 1941-43=10. Monthly data are averages of daily figures rather than of Friday's only. High and low are for Friday's data only.

2/ Standard and Poor's composite stock yield based on Wednesday data converted to weekly closing prices by Federal Reserve. Yields shown are for dates on which price index reached its high or low.

3/ Averages of daily trading volume on the New York Stock Exchange. Year-end figures are averages of daily figures for the year.

4/ End of month figures for member firms of the New York Stock Exchange which carry margin accounts; excludes balances secured by U. S. Government obligations.

5/ Wednesday figures for weekly reporting member banks. Excludes loans for purchasing or carrying U. S. Government securities. Weekly reporting banks account for about 70 per cent of loans to others. For further detail see Bulletin.

1/ Compiled by Federal Home Loan Bank Board in cooperation with Federal Deposit Insurance Corporation. Data are weighted averages based on probability sample survey of characteristics of conventional first mortgages originated by major institutional lender groups, (including mortgage companies) for purchase of single family homes. Data exclude loans for refinancing, reconditioning, or modernization; construction loans to home-builders; and—in this exhibit—permanent loans which are coupled with construction loans to owner-builders. Data are still in a developmental stage and may reflect seasonal influences which cannot yet be measured because the series go back only to end of 1962. Related series on conventional mortgage rates only, based on unweighted opinions of regional-office directors of the Federal Housing Administration, are available somewhat sooner than the results of FHBB-FDIC survey, and are included—in the case of new home mortgage rates—in Exhibit F, Parts I and II.

2/ Fees and charges—expressed as a percentage of the principal mortgage amount—include loan commissions, fees, discounts, and other charges which provide added income to the lender and are paid by the borrower. They exclude any closing costs related solely to transfer of property ownership.

Note: Averages of offering yields on all new issues of publicly offered corporate bonds rated Aaa, Aa and A by Moody's Investors Service (except serial and convertible issues, offerings of natural gas pipeline and foreign companies, and bonds guaranteed by the Federal Government) weighted by size of offering. Before averaging, new offerings are adjusted to a composite Aaa basis by deducting from the actual offering yield the excess of the weekly average yield for seasoned bonds of the appropriate industry-quality group over the composite average for seasoned Aaa-rated bonds (Moody's). Averages considered unrepresentative because of special characteristics of the offerings included are denoted by an asterisk.

p/ Preliminary. e/ Estimated by Federal Reserve. n.a.--Not available. 1/ These data differ from those in Exhibit H in that refunding issues, as well as new capital issues, are included. Long-term securities are defined as those maturing in more than one year. 2/ Includes securities offered in the U.S. by foreign governments and their political subdivisions and international organizations. Source: Securities and Exchange Commission. 3/ Issues not guaranteed by U.S. Government. Source: Long-term, Securities and Exchange Commission; short-term, Treasury Dept. & Fed. Reserve. 4/ These data differ from those in Exhibit H and above in that they represent new offerings less retirements, whether from the proceeds or refunding issues or from other funds. Data include only issues with original maturity of one year or less. 5/ Principally tax and bond anticipation notes, warrants, or certificates and Public Housing Auth. notes. In some instances PHA notes included may have a somewhat longer maturity than 1 year. Source: Bond Buyer & Federal Reserve.

Exhibit M

Foreign Government and Corporate Security Offerings
and Placements in the United States

Part I: Public Offerings

Sale Date	Amount (millions of dollars)	Issuer and Description of Issue
A. Sold August 1 through October 7		
9/21	10.0	Government of New Zealand--7% bonds, maturing 1976, reoffered to yield 7.28%. ***
B. Prospective Offerings		
Indefinite	20.0	Republic of Ireland--bonds
Indefinite	15.0	Nippon Telegraph and Telephone Public Corp--bonds

***Included in table for first time.

***--Issue sold to investors outside of U.S.

***--Issues subject to interest equalization tax.

Part II: Private Placements - Reported August 1 through October 7

Date Reported	Amount (millions of dollars)	Issuer and Description of Issue
9/23	59.5	Savage River Corp.--5-1/2% - 5-3/4% collateral trust notes, maturing 1976-83 --no information available on takedown.

Note: For retrospective data on aggregate foreign corporate and government security offerings in the United States see Exhibits I and J. There is no simple relationship between the data shown in the Exhibit and that shown in Exhibits I and J because the latter includes privately placed securities in the period in which funds are actually taken down but only in the amount of takedown while the placements shown in this exhibit are included when reported, frequently with little or no information concerning timing of takedown. Full or partial takedowns may take place both prior and subsequent to the date a placement is reported.
