November 28, 1966.

CAPITAL MARKETS DEVELOPMENTS IN THE UNITED STATES

Corporate and municipal bond markets. New municipal issues expected to be offered this week aggregate more than twice the average volume for such issues over the past year. The oft-postponed Oklahoma Turnpike issue (\$186 million) represents the largest offering on this week's calendar. Corporate offerings this week will be relatively light, but will build up substantially next week with nearly \$500 million expected to enter the market.

Nov. 18	200		305		
Nov. 25	60		211		
Scheduled:					
Dec. 2	110		350	110	

1/ Federal Reserve estimates are based upon published reports of issues sold and scheduled for offering; corporate rights offerings are included as of the date subscription rights expire.

Yields on corporate bonds changed little on balance during the holiday-shortened past week. One slow-moving corporate issue was released from underwriters price restrictions; subsequent free market trading resulted in an upward yield adjustment of 18 basis points.

Municipal yields advanced for the third consecutive week, but less sharply than the prior week. Three issues scheduled for sale last week were postponed -- two issues received no bids due to interest ceilings; while all bids received on the other issue were rejected.

Stock prices. Common stock prices declined slightly last week in relatively active trading. Standard and Poor's index of 500 stocks ended the week at 80.85, a decline of .41 points from the week earlier level. Trading volume averaged 7.0 million shares a day.

Capital Markets Section, Division of Research and Statistics, Board of Governors of the Federal Reserve System.

1/ Total starts are Census estimates including farm for both permit-issuing and non-issuing areas. A dwelling unit is started when excavation begins; all units in an apartment structure are considered started at that time. Pik and VA starts are units started under countinents by these agamins to insure or guarantee the morigages. As reported by Fik and VA, a unit is started when a field office receives the first compliance impaction report, which is made before footings are poured in seme cases but normally after the foundations have been completed. Capelart at litary housing units are excluded, other starts are derived as a residual, although total and Fik and VA starts are not strictly comparable in concept or timing other starts incline both units financed by conventional mortgages and units

2/ Building po maits before January 1963 are Census estimates for about 10,000 areas identified as having a local building permit system in 1979. Estimates beginning January 1963, are for approximately 12,000, or all knewn, permit-issuing places. Unlike starts, seasonally adjusted building permits project direct adjustment for differences in the number of working days per menth, as well as other Digitized foldifications in timing and coverage.

p/ Preliminary. e/ Estimated by Federal Reserve. n.a.-Not available. 1/ These data
differ from those in Exhibit H in that refunding issues, as well as new capital issues,
are included. Long-term securities are defined as those maturing in more than one year.
2/ Includes securities offered in the U.S. by foreign governments and their political
subdivisions and international organizations. Source: Securities and Exchange Commission.
3/ Issues not guaranteed by U.S. Government. Source: Long-term, Securities and Exchange
Commission; short-term, Treasury Dept. & Fed. Reserve. 4/ These data differ from those
in Exhibit H and above in that they represent new offerings less retirements, whether
from the proceeds or refunding issues or from other funds. Data include only issues with
original maturity of one year or less. 5/ Principally tax and bond anticipation notes.
warrants, or certificates and Public Housing Auth. notes. In some instances PHA notes
included may have a somewhat longer maturity than 1 year. Source: Bond Buyer & Federal
Reserve.

⁻⁻ Issue sold to investors outside of U.S.

⁻⁻⁻ Issue: subject to interest equalization tax.

Part II: Private Placements - Reported September 1 through November

Date Reported	Amount (millions of dollars)	Issuer and Description of Issue
9/23	59.5	Savage River Corp 5-1/2% - 5-3/4% collateral trust notes, maturing 1976-83no information available on takedown.
10/28	44.0	Bell Telephone of Canada6% lst mortgage bonds, maturing 1996\$335 takendown balance by Jan.13, 1967.
10/28	12.0	Canadian Fina Oil Ltd6-1/2% guaranteed notes, Maturing 1981to be taken down by March 30, 1967.

Note: For retrospective data on aggregate foreign corporate and government security offerings in the United States see Exhibits I and J. There is no simple relationship between the data shown in the Exhibit and that shown in Exhibits I and J because the latter includes privately placed securities in the period in which funds are actually taken down but only in the amount of takedown while the placements shown in this exhibit are included when reported, frequently with little on no information concerning timing of takedown. Full or partial takedowns may take place both prior and subsequent to the date a placement is reported.
