DECONTROLLED AFTER SIX MONTHS

CAPITAL MARKETS/DEVELOPMENTS  
IN THE UNITED STATES

Corporate and municipal bond markets. The volume of new corporate and municipal bonds expected this week will approximate last week's advanced new issue pace. In the corporate market, the largest issue will be J. C. Penney's \$125 million convertible debenture offering. Dominating the heavy municipal calendar are the offerings of New York City (\$106.9 million) and Pennsylvania State Highway and Bridge Authority (\$100 million). Included in the estimated corporate volume this week is the convertible debenture offering to stockholders of American Broadcasting Company.

<sup>1/</sup> Federal Reserve estimates are based upon published reports of issues sold and scheduled for offering; corporate rights offerings are included as of date subscription rights expire.

Yields on new issues of corporate bonds declined significantly last week. The largest offering was the Standard Oil of New Jersey issue--Aaa-rated and carrying 10-year call protection--which underwriters priced to yield 6.50 per cent. Following the immediate sell-out of this issue, investor interest in older issues picked up substantially and by week-end nearly all bonds in syndicate were sold.

Municipal bond yields also declined last week, although the lagging Moody's seasoned index showed no change. Investor interest in last week's new issues improved as the week progressed and about three-fourth's of the new offerings were taken out of the market by the end of trading on Friday.

1/ Data represent unpaid principal balances of the mortgages involved, exclusive of premiums, discounts, or other charges. Offerings are amounts of applications received during the period from sellers proposing that FNMA execute purchasing contracts. An immediate purchase contract covers existing mortgages which the seller must deliver to FNMA within 45 days. A standby commitment contract relates to proposed mortgages on housing not yet under construction which the seller must usually deliver within one year. Purchases include those under both immediate purchases and standby commitment contracts. Data exclude FNMA activity under Special Assistance and Management and Liquidating Programs.

Before averaging, new offerings are adjusted to a composite Aaa basis by deducting from the actual reoffering yield the excess of the weekly average yield for seasoned bonds of the appropriate industry-quality group over the composite average for seasoned Aaa-rated bonds (Moody's). Averages considered unrepresentative because of special characteristics of the offerings included are denoted by an asterisk.

NOTE: For retrospective data on aggregate foreign corporate and government security offerings in the United States see Exhibits I and U. There is no simple relationship between the data shown in the Exhibit and that shown in Exhibits I and J because the latter includes privately placed securities in the period in which funds are actually taken down but only in the amount of takedown while the placements shown in this exhibit are included when reported, frequently with little or no information concerning timing of takedown. Full or partial takedown may take place both prior and subsequent to the date a placement is reported.
