OF MISSOURICAPITAL MARKETS DEVELOPMENTS  
IN THE UNITED STATES*Capital market*

**Corporate and municipal bond markets.** In both the corporate and municipal securities markets, the volume of new publicly-offered issues expected this week is somewhat below the average weekly volume over the past year. The largest corporate offering will be the Ashland Oil and Refining Company's \$60 million of debentures. Dominating the municipal market will be \$74 million of New York State Housing Finance Agency revenue bonds. Supplementing the week's long-term volume will be \$229.5 million of Federal Land Bank bonds, of which \$160.0 million will be for refunding.

<sup>1/</sup> Federal Reserve estimates are based upon published reports of issues sold and schedule for offering; corporate rights offerings are included as of date subscription rights expire.

Yields on new and seasoned corporate bonds declined again last week, but aggressive pricing led to a very cool reception for the week's only competitively-offered new issue. By the end of the week only about one third of the offering had been sold.

Yields on municipals also declined last week, but in that new issue market there was marked investor enthusiasm. Indeed, by week's end 80 per cent of the new issues had been taken out of the market.

**Stock prices.** Common stock prices continued their retreat last week as trading volume subsided markedly. Over the week the Standard & Poor's index of 500 stocks lost 1.71 points, closing Friday at 96.63. Trading volume averaged 11.4 million shares a day.

NOTE: For retrospective data on aggregate foreign corporate and government security offerings in the United States see Exhibits I and U. There is no simple relationship between the data shown in the Exhibit and that shown in Exhibits I and J because the latter includes privately placed securities in the period in which funds are actually taken down but only in the amount of takedown while the placements shown in this exhibit are included when reported, frequently with little or no information concerning timing of takedown. Full or partial takedown may take place both prior and subsequent to the date a placement is reported.
