

## STATEMENT FOR THE PRESS.

December 31, 1915.

A year's development and growth of the resources and liabilities of the Federal reserve system is indicated by the weekly bank statement of the Federal Reserve Board made public today as at close of business on December 30, 1915. This date, rather than the last of the year, was chosen in order to permit the publication of the data on the first of the new year.

The total reserves of the banks show an increase during the year of about 102.9 million dollars, while their aggregate gold reserves show an even larger increase of 115.9 millions. The gold resources of the system include besides the gold reserves of the banks also the amounts of gold turned over by the banks to the Federal Reserve Agents to reduce the banks' liabilities upon outstanding reserve notes. The amounts of gold held by the Agents increased from 12.3 millions at the end of 1914 to 70.6 about the middle of 1915 and to 197.4 millions at the close of the year. The increase for the year in the total gold resources of the system was over 301 million dollars, the larger portion of which represents the gain in the Agents' gold holdings. Of the total gold reported at the end of the present year 406.5 millions or nearly 75 per cent are held in the banks or in the Reserve Agents' vaults, while 135.9 millions are either in the Gold Settlement or in the Gold Redemption Funds at Washington. About one-half of the system's gold is held by the New York bank and its Reserve Agent, less than 7.5 per cent by Chicago, less than 6 per cent each by Cleveland and Richmond, over 5 per cent by Boston, while the remaining 25 per cent is distributed among 7 banks and reserve agents.

The earning assets of the banks, composed of discounted bills, Bankers' acceptances, short-term municipal and State securities, and United States bonds, stand at present at 83.4 millions. This is about 152 per cent of the paid-in capital of the banks as against 60 per cent at the end of 1914 and 104 per cent about the middle of the year. Of the total earning assets about 39 per cent is represented by discounted bills on hand, over 27 per cent by Bankers' acceptances, less than 19 per cent by United States bonds, and the remainder by municipal warrants. - The three Southern banks report almost 64 per cent of all commercial paper held. Chicago and Kansas City are the only two other banks which show substantial holdings of discounted paper, while the remaining 7 banks are credited with only 13 per cent of the commercial paper on hand. - Over 7.5 millions, or 23 per cent of the commercial paper held, is commodity paper, discounted at special, lower rates. Trade acceptances on hand total 712,000 dollars.

About 77 per cent of all acceptances on hand are credited to the three Eastern Seaboard banks, and nearly 9 per cent to Chicago. Of all the paper held at present by the banks 37.5 per cent matures within 30 days, and 30.4 per cent after 30 but within 60 days. Agricultural and live-stock paper in the hands of the banks aggregates at present over 4 million dollars, and constitutes 7.4 per cent of the entire bill holdings. The holdings of United States bonds are distributed among nine banks, Chicago, Cleveland and Kansas City reporting nearly 55 per cent of the total. Over three-quarters of the bonds are of the 2 per cent type against which Federal reserve bank notes may be issued. The aggregate of warrants held at present is less than half the amount shown during the preceding month, although all the banks report among their assets State or city warrants.

The net reserve deposits of member banks have reached a total of over 400 million dollars, an increase during the year of 136.1 millions, and during the last 6 months of 102.1 million dollars. Government deposits totaling 15 million dollars are held at present by the three Southern banks only.

Federal Reserve Agents report a total of 214.1 millions of notes outstanding. About 42 per cent of the total was issued to the New York bank and over 23 per cent to the three Southern banks. Against the total issued the Agents hold 197.5 millions of gold and 16.7 millions of paper. The banks show a total circulation of 189 millions and an aggregate note liability of about 13.5 million dollars.

Released for publication Saturday morning January 1, 1916. Not earlier.

STATEMENT FOR THE PRESS.

January 8, 1916.

The weekly Federal Reserve Bank statement as at close of business on January 7, 1916 was made public today by the Federal Reserve Board. The statement indicated an increase during the week of 9.5 millions in the combined gold reserves and an increase of 8.8 millions in the aggregate cash reserves of the banks. Considerable gains are also shown in the amounts of bankers' acceptances, warrants and United States bonds on hand. Government deposits were made during the week with all the banks, the total held at the end of the week being 23.8 million dollars as against 15.1 millions shown for December 30 of the past year. Federal reserve bank notes were issued by the Comptroller to one bank; though none of these notes is yet in actual circulation.

The largest gains during the week in gold reserves are reported by the Chicago, New York, San Francisco and St. Louis banks. The gold holdings of the system, including amounts held by Federal reserve agents against notes outstanding total now 554.1 millions, compared with 415.5 millions about 3 months before and 340.5 millions about 6 months before. During the past 6 months the amount of gold held by the banks increased about 33 per cent, while the gold holdings of the Federal reserve agents increased about 170 per cent.

The aggregate of commercial paper in the hands of the banks declined during the week 1.8 million dollars, the 3 Southern banks as well as Kansas City, with about 74 per cent of the total, reporting smaller figures than the week before. Bankers' acceptances on hand show an increase of about 2 millions, New York and Boston reporting the largest gains for the week. Of the total amount of paper held, bankers' acceptances constitute now over 45 per cent, as against 41.5 at the end of the preceding week and 26.2 per cent about 6 months before. Over 37 per cent of the paper matures within 30 days and about 32 per cent after 30 days but within 60 days. The banks show total holdings of about 3.9 millions of agricultural and live-stock paper maturing after 90 days or 7.1 per cent of the total amount of paper on hand.

The purchase of over 1 million dollars of United States bonds is reported during the week by 7 banks. The holdings of municipal warrants increased about 4.9 millions largely as the result of investments by the New York Bank in New York City short-term revenue bonds. The total earning assets, amounting at present to 89.4 millions, constitute now about 163 per cent of the aggregate capital of the banks, as against 152 per cent on December 30, and 108 per cent on July 9, of the past year. Net reserve deposits increased 7.2 millions, New York and St. Louis reporting the largest gains during the week.

Federal Reserve Agents report a total of 215.5 millions net of reserve notes issued to the banks, an increase during the week of 1.4 million dollars. Their gold holdings increased 2.2 millions, whereas the aggregate amount of paper in their hands decreased over 0.5 million dollars. The banks report a total circulation of 188.5 millions and an aggregate liability thereon of about 13 millions, which is also about 0.5 million less than the corresponding total at the end of the past year.

Released for publication Sunday morning January 9, 1916. Not earlier.
