

STATEMENT FOR THE PRESS.

September 9, 1916.

Large gains of gold and cash reserves, and corresponding increases in net bank deposits are indicated by the regular weekly bank statement made public today by the Federal Reserve Board as at close of business on Friday, September 8, 1916.

Considerable increases of gold holdings are reported by the Southern and Western banks, except Chicago, largely the result of heavy transfers during the week made by New York through the Gold Settlement Fund. Besides a gain of 17.9 millions in gold reserve the banks also show a gain of 13.9 millions in reserves other than gold, the larger increase under this head reported by the New York bank being slightly offset by net withdrawals of cash other than gold from some of the other banks. A gain of about 19 millions in total reserve reported by the New York bank is accompanied by a gain of over 21 millions Government and net bank deposits, a decrease of about 3.8 millions in the aggregate balances due to other Federal reserve banks, and increases of about 1-1/2 million dollars in the amounts transferred to the Agent to reduce the bank's liability upon notes issued by the latter, and of 3.6 millions in the amount of Federal reserve notes put in circulation by the bank. Smaller reserves of Boston and Philadelphia go hand in hand with increased investments, mainly the purchase of acceptances, while Chicago's decrease in reserves was caused mainly by the withdrawal of Government funds.

Discounted paper held by the banks shows an increase for the week of 1.1 millions, the New York and Chicago banks reporting substantial gains under this head. Acceptances on hand show a gain of over 1/2 million, the holdings of the Philadelphia and Richmond banks indicating the largest increases for the week. Of the total bills - including acceptances - on hand, 43.4 per cent matured within 30 days, and 36.9 per cent after 30 but within 60 days.

Transactions in United States securities, including the conversion of 2 per cent bonds, are reported by 9 institutions, the net result being a decrease of \$867,000 in the total of United States bond holdings and an increase of \$850,000 in the amount of one-year Treasury notes held. Municipal warrants on hand increased \$136,000, eight banks reporting a gain transactions under this head. Total earning assets stand at \$183,510,000, of over 1.5 millions for the week, and constitute now 331 per cent of the total paid-in capital of the banks, as against 329 per cent shown for the week before. Of the total earning assets acceptances represent 43.5 per cent; United States bonds, 25.1 per cent; discounts, 15.0 per cent; warrants 11.5 per cent; and Treasury notes, 4.9 per cent.

Government deposits declined about 6.7 millions, Boston, New York, and Chicago reporting the largest net withdrawals for the week. Net bank deposits, on the other hand, show an increase of nearly 30 millions, the New York bank statement indicating a gain of over 25 millions, of which about 10 millions is due to an increase in gross bank deposits and an even larger amount to the reduction in the amounts of clearing house exchanges, which are treated as deductions from gross deposits.

Dallas, for the first time, reports Federal reserve bank notes in circulation, the total increase for the week of bank notes issued by the Kansas City and Dallas banks being \$644,000. Federal reserve notes aggregating \$199,218,000 - or \$4,573,000 more than the week before - are reported outstanding by Federal Reserve Agents. Against this total they hold \$181,029,000 of gold and \$18,702,000 of paper. The banks report \$177,781,000 of Federal reserve notes in circulation, and aggregate liabilities of \$16,076,000 on notes issued to them by the Agents.

Released for publication Sunday morning September 10, 1916. Not earlier.

STATEMENT FOR THE PRESS.

September 16, 1916.

Increases for the week of 6.5 millions in earning assets and of 7.8 millions in the combined gold reserves, a decrease of 11.8 millions in aggregate cash reserves, and net withdrawals of 4 millions of Government deposits, are indicated by the regular weekly bank statement, made public to-day by the Federal Reserve Board as at close of business on Friday, September 15, 1916.

New York reports an increase of 5.6 millions in its gold reserve, and a decrease of 14.9 millions in its total cash reserve. The reduction in the bank's reserve results from net withdrawals of Government and member bank deposits, a reduction of the balance due to other Federal reserve banks, additional investments and transfers of gold to the Agent to reduce the bank's liability on Federal Reserve notes. Chicago shows a substantial gain in reserve together with a reduction of its favorable aggregate balance with other Federal reserve banks. Losses of gold in the weekly settlement account largely for the decreases in reserves shown for the Minneapolis and Kansas City banks. Richmond's gain in total reserve is due mainly to a change of a favorable to an adverse balance in its accounts with other Federal reserve banks.

Aggregate holdings of discounted paper increased less than \$200,000 during the week, the larger increase reported by the Richmond bank being more than offset by decreases shown in the holdings of the Atlanta and Dallas banks. The total of 27.7 millions is inclusive of the amounts advanced to member banks on their own notes secured by collateral in the shape of commercial paper. Such advances were authorized by a recent amendment of the Federal Reserve Act, and special rates for such loans have been announced by five banks. Bills bought in open market, mainly bankers' acceptances, show an increase of 2.8 millions, the three eastern banks and Cleveland reporting substantial gains in their holdings of this class of paper. Of the total bills, including acceptances, on hand, 43.7 per cent mature within 30 days, and 36 per cent after 30 but within 60 days.

A gain of about 1 million in the amount of U. S. bond holdings is shown, mainly the result of considerable purchases during the week of 2 per cent bonds by the New York and Cleveland banks. Investments on a large scale in New Jersey and New England city bonds account for an increase of over 2.5 millions in the total of municipal warrants held. Earning assets are close to 190 millions, and constitute 343 per cent of the total paid-in capital, as against 331 per cent shown the week before. Of the total earning assets acceptances represent 43.5 per cent; U. S. bonds 24.7 per cent; discounts 14.6 per cent; warrants 12.5 per cent; and Treasury notes 4.7 per cent.

The week witnessed considerable withdrawals of Government funds from the Reserve banks in the three central reserve cities and Boston. Member bank deposits show but slight change in the aggregate.

Federal reserve bank notes in circulation increased by about \$880,000 during the week. The net amount of Federal reserve notes issued to the banks stands now at \$202,530,000, an increase of \$3,312,000 for the week. Against this total the Agents hold \$185,161,000 of gold and \$18,452,000 of paper. The banks report a total of \$179,409,000 of Federal reserve notes in circulation, and aggregate liabilities of \$14,223,000 upon notes issued to them by the Agents.

Released for publication Sunday morning September 17, 1916. Not earlier.
