The Federal Roserve Board made public today its weekly statement showing the concition of each Federal Reserve Bank and of the system as a whole as at close of business on November $10,1916$.

The statement indicates large purchases during the week of bank acceptances, the ameunt on hand, - \$90,913,000 - being the largest. ever shown in the Board!e weekly statements. Total investments of the banks show but little change, owing to considerable sales of United States bonds and liquidation on a large scale of city warrants, mainly New England town notes.

No appreciable changes in either gold or cash reserves of the system are shown, though considerable shifting of funds between the banks, mainly through the Goid Settlement Fund, was effected during the past week. The largest transfers of gold were made by the New York, Boston and Atlanta banks. Gold to the amount of 6.3 millions was transferred during the week to the Agents against Federal reserve notes issued to the banks, the total gold holdings of the Agents reaching the unprecedentedly large total of $\$ 231,339,000$. The gold resources of the system, including the amounts held by Banks and Agents, stand now at $\$ 638,175,000$, which is more than $25 \%$ of the total gold of the country hela outside the United States Treasury. Since the corresponding date in 1915, when the gold resources of the system totaledi: $\$ 460,602,000$, the gold in the banks has increased by $\$ 109,389,000$, while the gold with the Agents has increased by $\$ 68,184,000$.

Discounted paper on hand shows a decrease for the week of about $\$ 300,000$, notwithstanding the increase of over 1.1 millions in discounts reported by the Boston bank, practically all other banks active in the discount field, especially the 3 Southern banks, reporting reduced holdings of this class of paper. Of the total discounts, about $1-1 / 3$ millions is represented by members' collateral notes discounted for banks, largely of the Philadelphia and Atlanta districts. Acceptances on hand increased about 5.8 millions, New Tork, Boston and San Francisco reporting large purchases for the wesk. Of the total bills - including acceptances - on hand about 32 per cent mature within 30 days, and 41 per cent - after 30 but within 60 days.

Transactions in Government securities are reported by 10 banks, resulting in decreases of $\$ 1,687,000$ in the amount of United States bonds and of $\$ 20,000$ in the amount of Treasury notes on hand. A decrease of over 3.4 millions is shown in the aggregate holdings of warrants. Totai earning assets - \$181,187,000 - are about \$400,000 larger than the week before, and constitute 325 per cent of the banks' paid-in capital, as against 348 per cent about 3 months, and 300 per cent about 6 months previous. Of the total earning assets 50.2 per : cent is represented by acceptances; 21.5 per cent by United States bonds; 12.3 per cent by warrants; 10.7 per cent by discounts; and 6.3 per cent by Treasury notes.

Government deposits declined about 5.3 millions, Richmond, Chicago and St. Louis reporting considerable not withdrawals of Government funds for the week. Net bank deposjits increased 4.1 millions, large gains under this head being shown for the Philadelphia, Cleveland and St, Louis banks.

Federal reserve bank notes in circulation show a slight decline. The Agents report the issue of $\$ 247,873,000$, net, of Federal reserve notes, secured by $\$ 231,339,000$ of gold and $\$ 16,735,000$ of paper. Most of the banks report largerdmounts of Federal reserve notes in circulation, the increase for the week being $\$ 7,674,000$. The banks'aggregate liabilities upon notes issued to them by the Agents are stated as $\$ 13,886,000$.

STATEIEN FOR TYE PDESS.

November 18, 1916.

Transfers of the last instalment of reserves by member banka outside of central. reserve cities, due on November 16, account for the considerable increases in Federal reserve banks' gold and cash reserves and in their net bank deposits, as indicated by the Federal Reserve Board's weekly bank statement as at close of business on November 17, 1916.

Judging from the large increaso in the amount of items in transit between Federal reselve banks, a considerable portion of the additional reserves must have been deposited by nember banks in the shape of checks and drafts on New York and other reserve city barks. Eight banks report an aggregate gain of sash reserve for the week of $\$ 43,675,000$. Decreases in cash reserves of $\$ 5,598 ; 000$ reported by $f$ our banks are more than fully offset by inereases in the amounto due these banks from other Federal reserve banka. of the $\$ 38,077,000$ added during the week to the banka' cash reaerves, $\$ 28,809,000$ was gold and $\$ 9,268,000$ silver and legals. The New York bank reports a total gain in reserve. of $\$ 22,191,000$, of which $\$ 9,469,000$ represents the addition of silver and legals to the bank's reserve.

Owing to large dyecount operations reportod by the Boston bank, the aggregate of discounted paper on hand shows a gain for the week of \$324,000, notwithstanding the smaller totals given by the three Southern banks. Acceptances on hand increased $\$ 6,076,000$, all the banks except Boston reporting largar holdings of this class of paper than the week before. Of the total bills - including accentances - on hand about 35 per cent mature within 30 days and over 39 per cent after 30 but within 60 days.

Transactions in United States securities are revorted by all the banks except Atlanta, resulting in an increase by $\$ 262,000$ in the amount Of United States bonds and a decrease by $\$ 180,000$ in the amount of Treasury notes on hand. Further liquidation of municipal warrants accounts for the decrease by $\$ 2,097,000$ in the an:ount held.

Total earning asiets are about $\$ 5,185,000$ larger than the week before and constitute 335 per cent of the banks' paid-in capital, compared with 325 per cent the weok before. Of the totel earning asset 52.4 per cert is represented by acceptences; 21.0 per cent by United Statea honds; 10.6 per cent by discounts; 10.0 per cent by warrants, and 6 per cent by Treasury notes.

Government deposits show an increase for the week of $\$ 1,832,000$ Boston and Chicago reporting large gains under this head. The gain in net member bank deposits is $\$ 65,792,000$, which is approximately the zmount of the lest reder:pe instalment due on November 16. The exact amount paid in ou account of this instament is unknown, since many member banks have been carrying and continue to carry excess balances with their Federal reserve banks and their payments on account of the transfer instalment due can not be ascertained.

No change is show in the circulation of Federal reserve bank notes. A total of $\$ 255,702,000$, net, of Federal reserve notes is shown to have been issued to the banks, an increase for the woek of $\$ 7,829,000$. Against this.amount the Agents hold $\$ 238,458,000$ of gold and $\$ 17,833,000$ of peper. The banks show $\$ 238,670,000$ of Federal reserve notes incirculation and a net liability of $\$ 14,468,000$ upon notes issued to them by the Agents.
