STATEIENM FOR THE PRESS.

November 18, 1916.

Transfers of the last instalment of reserves by member banks outside of central reserve cities, due on November 16, account for the considerable increases in Federal reserve banks' gold and cash reserves and in their net bank deposits, as indieated by the Federal Reserve Board's weekly bank statement as at close of business on November 17, 1916.

Judging from the large increase in the amount of items in transit between Federal reselve banks, a considerable portion of the additional reserves must have been deposited by member banks in the shape of checks and drafts on New York and other reserve city banks, Eight banks report an aggregate gain of sash reserve for the week of $\$ 43,675,000$. Decreases in cash reserves of $\$ 5,598 ; 000$ reported by four banks are more than fully of fiset by tncreases in the amourts due these banks from other Federal reserve banks. Of the $\$ 38,077,000$ added during the week to the banka' cash reserves) $\$ 28,809,000$ was gold and $\$ 9,268,000$ silver and legals. The New York bank reports a total gain in reserve. of $\$ 22,191,000$, of which $\$ 9,469,000$ represents the addition of silver and legals to the bank's reserve.

Owing to large dsecount operations reported by the Boston bank, the aggregate of discounted paper on hand shows a gain for the week of $\$ 324,000$, notwithstanding the smaller totals given by the three Southern banks. Acceptances on hand increased $\$ 6,076,000$, all the banks except Boston reporting larger holdings of this class of paper than the week before. Of the total bills - including acceptances - on hand about 35 per cent mature within 30 days and over 39 per cent after 30 but within 60 days.

Transactions in United States securities are reported by all the bank except Atlanta, resulting in an increase by $\$ 262,000$ in the amount of United States bonds and a decrease by $\$ 180,000$ in the amount of Treasury notes on hand. Further liquidation of municipal warrants accounts for the decrease by $\$ 2,097,000$ in the ar:ount held.

Total earning asiets are about $\$ 5,185,000$ larger than the week before and constitute 335 per cent of the banks' paid-in capital, compared with 325 per cent the week before. Of the totel earning assets 52.4 per cert is represented by acceptences; 21.0 per cent by United Statea honds; 10.6 per cent by discounts; 10.0 per cent by warrants, and 6 per cent by Treasury notes.

Government deposits show an increase for the week of $\$ 1,832,000$ Boston and Chicago reporting large gains under this head. The gain in net member bank deposits is $\$ 65,792,000$, which is approximately the amount of the lest reder:pe instalment due on November 16 . The exact amount paid in ou account of this instalment is unknown, since many member bank; have been carrying and continue to carry excess balances with their Federal reserve banks and their payments on account of the transfer instalment due can not be ascertained.

No change is show in the circulation of Federal reserve bank notes. A total of $\$ 255,702,000$, net, of Federal reserve notes is shown to have been issued to the banks, an increase for the woek of $\$ 7,829,000$. Against this amount the Agents hold $\$ 238,458,000$ of gold and $\$ 17,833,000$ of paper. The banks show $\$ 238,670,000$ of Federal reserve notes incirculation and a net liability of $\$ 14,468,000$ upon notes issued to them by the Agents.
