

STATEMENT FOR THE PRESS.

October 5, 1918.

Substantial increases in the holdings of war paper, i.e., bills secured by Liberty bonds and Treasury certificates, more than offset by decreases of other discounts on hand, also further increases in Federal Reserve note circulation are indicated by the Federal Reserve Board's weekly bank statement issued as at close of business on October 4, 1918.

INVESTMENTS: Holdings of war paper increased \$4.4 millions, notwithstanding net liquidation of 17.8 millions at the New York bank. The largest increases under this head are shown for the Chicago and San Francisco banks. Other discounts on hand fell off \$2.8 millions, all the banks except those at St. Louis and Kansas City reporting smaller figures under this head than the week before. Acceptances on hand went up \$3.6 millions, Boston, Philadelphia, Cleveland and Chicago reporting considerable additions to their holdings of this class of paper, of which a portion came from the portfolio of the New York bank. An increase of 6.4 millions in U.S. short-term securities represents in part 2 per cent Treasury certificates deposited with the U.S. Treasurer to secure Federal Reserve bank note circulation. Total earning assets show an increase for the week of \$1.5 millions.

DEPOSITS: Government deposits were 5.7 millions in excess of the total shown the week before. Members' reserve deposits fell off \$8.7 millions and net deposits - \$6.8 millions.

RESERVES: The week saw a considerable flow through the Gold Settlement Fund of reserves from the interior to New York. There is also shown a gain of 4.6 millions in gold reserves and of 5.2 millions in total cash reserves. The banks' reserve percentage declined slightly from 51.6 to 51.5 per cent.

NOTE CIRCULATION: Federal Reserve Agents report a net addition of 89.2 millions to the total of Federal Reserve notes outstanding. The banks show an increase for the week of \$1.7 millions of Federal Reserve notes in circulation besides an increase of 4.5 millions in their aggregate liabilities on Federal Reserve bank notes in circulation.

CAPITAL: Payment for Federal Reserve bank stock by newly admitted members, largely in the Cleveland and Chicago districts is mainly responsible for an increase of \$101,000 in the total paid-in capital shown in this week's statement.

CONDITION OF MEMBER BANKS, SEPTEMBER 27, 1918.

Large withdrawals of Government deposits, accompanied by moderate increases in demand deposits, also liquidation in some volume of U.S. bonds and Treasury certificates are indicated by the Board's consolidated weekly statement of condition on September 27 of 741 member banks in leading cities.

The week saw net liquidation of 15.2 millions of U.S. bonds other than circulation bonds, while Treasury certificate holdings declined 22.4 millions. This decline is due entirely to the reduction of over 45 millions in the certificate holdings of the Greater New York member banks, the banks in the interior reporting uniformly small gains for the week. Loans secured by U.S. war obligations likewise fell off 11.5 millions, this decrease again being due ~~entirely~~ to the reduction of the item at the New York banks. Other loans and investments show a gain of 32.9 millions, the central reserve city banks reporting a slightly larger increase under this head. Of the total loans and investments the combined share of U.S. war obligations and loans secured by such obligations constituted 17.9 per cent as against 18.2 per cent the week before. For the central reserve city banks this ratio declined from 20.1 to 19.3 per cent.

During the week the Government withdrew 205.4 millions net from reporting depository institutions, the banks in the central reserve cities reporting net withdrawals of 112.6 millions. Net demand deposits show an aggregate gain of 65.1 millions, largely outside the central reserve cities. Time deposits decreased about 36 millions, mainly at the country banks. Reserve balances with the Federal Reserve banks of all reporting banks declined 11.6 millions, the decrease being confined however to the central reserve city banks. Cash in vault fell off 9.6 millions, mainly outside the central reserve cities.

For all reporting banks the ratio of investments to deposits increased from 125.9 to 127.6 per cent, while for the central reserve city banks this ratio shows a rise from 117.5 to 119.2 per cent. The ratio of combined reserve balances and cash to deposits of all reporting banks increased from 15 to 15.1 per cent. For the banks in the central reserve cities, owing to the reduction in their reserve balances this ratio declined from 16.4 to 16.3 per cent. "Excess reserves" of all reporting banks work out 83.4 millions compared with 100.9 millions the week before. For the central reserve city banks a decrease of this item from 77.7 to 56.8 millions is noted.

Released for publication Sunday morning October 6, 1918. Not earlier.
