Federal Reserve Board
September 13, 1919

CONDITION OF FEDERAL RESERVE BANKS.

Liquidation of 110.7 millions of war paper and a further gain of 51.1 millions in gold in transit or in custody in foreign countries are indicated in the Federal Reserve Board's weekly bank statement issued as at close of business on September 12, 1919.

As against the large reduction in the holdings of war paper the banks report increases of 18 millions in other discounts and of 7.3 millions in acceptances. War paper holdings of the Cleveland, Chicago, St. Louis and Minneapolis banks include 45.4 millions of paper discounted for other Federal Reserve banks, while acceptance holdings of the Kansas City and San Francisco banks are inclusive of 45.6 millions (as against 51.2 millions the week before) purchased from other Federal Reserve banks. Temporary advances to the Government by the New York and Chicago banks pending the receipt of funds from depositary institutions account mainly for a net increase of 91.4 millions in the holdings of Treasury certificates.

Government deposits show a decline of 25.5 millions, while reserve deposits went up 45.2 millions, and other deposits including foreign government credits - 35 millions. On the other hand the "float" carried by the Federal Reserve banks and the gold held in custody abroad - both of which items are treated as deductions from gross deposits - show increases of 10.1 and 51.1 millions. The result is a decrease of 5.9 millions in net deposits. Federal Reserve note circulation increased 9.5 millions, notwithstanding a substantial reduction in Federal Reserve note circulation reported by the New York Bank. The banks' aggregate liabilities on Federal Reserve bank notes in circulation increased by 4.6 millions. Gold reserves went up 1.8 millions and total cash reserves - 1.6 millions. The banks' reserve ratio continues unchanged at 50.4 per cent.

Released for publication Sunday morning September 14, 1919; not earlier.

STATEMENT FOR THE PRESS

St. 591

Released for publication
Monday morning, September 15, 1919;
not earlier.

Federal Reserve Board
September 13, 1919.

CONDITION OF MEMBER BANKS.

Considerable investment by member banks in the recent issue of Treasury loan certificates and a corresponding increase in government deposits, is indicated by the Federal Reserve Board's statement of condition on September 5 of 774 member banks in leading cities.

Holdings of U. S. bonds and Victory notes show but slight changes, while certificates of indebtedness on hand went up 178.9 millions, of which 71.9 millions represent the increase for the New York City member banks. War paper on hand shows a reduction of 7.8 millions. Loans secured by stocks and bonds increased 39.8 millions, in spite of a 3.4 million decline in this item shown for the New York City banks. Other loans and investments show an increase of 56.6 millions, largely in New York.

Aggregate holdings of Government war securities and war paper increased from \$3,414.3 to 3,582.7 millions and constitute 23.5 per cent of the total loans and investments of all reporting banks as against 22.8 per cent the week before. For the New York banks an increase in this ratio from 26.9 to 27.6 per cent may be noted.

Government deposits show an increase of 162.4 millions, this increase apparently representing to a large extent credits placed to government account by members subscribing to the September 2 certificate issue. On the other hand the increase in other demand deposits (net), 99.8 millions, is slightly in excess of the increase in loans and investments other than Government securities and war paper. Reserve balances with the F. R. banks went up 16.3 millions, while cash in vault increased 19.7 millions.

Accommodation at the F. R. banks, as measured by the amount of collateral notes and customers' paper discounted for reporting banks, shows an increase for the week of 34.1 millions. Of the total discounts held on September 5 by all F. R. banks the amount held for reporting banks was over 78 per cent.

STATEMENT SHOWING PRINCIPAL RESOURCE AND LIABILITY ITEMS OF MEMBER BANKS IN LEADING CITIES.

GOLD AND SILVER IMPORTS AND EXPORTS IN 1919.

The Federal Reserve Board has just completed its compilation of gold and silver imports into and exports from the United States for the calendar year 1919. Gold imports for the year just ended totaled 76.5 millions, compared with 62.0 millions for the calendar year 1918, while gold exports totaled 368.1 millions, compared with 40.8 millions exported in 1918. Net gold exports for 1919 amount to 291.6 millions, as against 21.1 millions the year before. The 1919 figures are, however, exclusive of 173.4 millions of gold received from the Reichsbank for foodstuffs sold to the German government. This gold is held at present in London with the exception of about 42 millions which were subsequently sold by the Federal Reserve banks and released to foreign interests. Counting the 131.3 millions held on December 31 by the Bank of England for the Federal Reserve banks as an offset against the net exports above shown, the net loss of gold through transfer abroad is reduced to 160.3 millions. Of the gold imports over three-fourths is credited to Canada, Hongkong, the United Kingdom and Mexico, while of the gold exports 94.1 millions were consigned to Japan, and over 125 millions to the other Far Eastern countries; i.e., China, Hongkong, British India, Straits Settlements and Dutch East Indies; 56.6 millions to Argentina, 33 millions to other South American countries, 29.8 millions to Spain and 10.4 millions to Mexico.

Silver imports during 1919 totaled 89.4 millions, compared with 71.4 millions in 1918, while silver exports during 1919 were about 239 millions compared with 252.8 millions the year before. By far the larger portion of the silver exported in 1919 was consigned to the Far East, British India being credited with 109.2 millions, China with 77.6 millions and Hongkong with 10.2 millions. The three countries named account for over 80 per cent of the total value of silver shipped to foreign destinations during the past calendar year. It is worth noting that silver exports to India, which constituted by far the larger portion of the total foreign silver shipments during 1918 and 1919 to September 10, have practically ceased since and been superseded by large gold shipments to that country during the latter part of the year.

GOLD AND SILVER IMPORTS AND EXPORTS IN 1919.

The Federal Reserve Board has just completed its compilation of gold and silver imports into and exports from the United States for the calendar year 1919. Gold imports for the year just ended totaled 76.5 millions, compared with 62.0 millions for the calendar year 1918, while gold exports totaled 368.1 millions, compared with 40.8 millions exported in 1918. Net gold exports for 1919 amount to 291.6 millions, as against 21.1 millions the year before. The 1919 figures are, however, exclusive of 173.4 millions of gold received from the Reichsbank for foodstuffs sold to the German government. This gold is held at present in London with the exception of about 42 millions which were subsequently sold by the Federal Reserve banks and released to foreign interests. Counting the 131.3 millions held on December 31 by the Bank of England for the Federal Reserve banks as an offset against the net exports above shown, the net loss of gold through transfer abroad is reduced to 160.3 millions. Of the gold imports over three-fourths is credited to Canada, Hongkong, the United Kingdom and Mexico, while of the gold exports 94.1 millions were consigned to Japan, and over 125 millions to the other Far Eastern countries; i.e., China, Hongkong, British India, Straits Settlements and Dutch East Indies; 56.6 millions to Argentina, 33 millions to other South American countries, 29.8 millions to Spain and 10.4 millions to Mexico.

Silver imports during 1919 totaled 89.4 millions, compared with 71.4 millions in 1918, while silver exports during 1919 were about 239 millions compared with 252.8 millions the year before. By far the larger portion of the silver exported in 1919 was consigned to the Far East, British India being credited with 109.2 millions, China with 77.6 millions and Hongkong with 10.2 millions. The three countries named account for over 80 per cent of the total value of silver shipped to foreign destinations during the past calendar year. It is worth noting that silver exports to India, which constituted by far the larger portion of the total foreign silver shipments during 1918 and 1919 to September 10, have practically ceased since and been superseded by large gold shipments to that country during the latter part of the year.
