CONDITION OF FEDERAL RESERVE BANKS

Increases of $34,900,000 in holdings of discounted bills, of $2,800,000 in holdings of United States securities, and of $24,000,000 in member bank reserve deposits are shown in the Federal Reserve Board's weekly consolidated bank statement issued at close of business on August 29, 1923. Total, reserves and Federal reserve notes in circulation show but nominal changes, while the reserve ratio declined from 77.9 to 77.5 per cent.

Increases in the holdings of discounted bills are reported by the three eastern banks and the banks of Atlanta and San Francisco. The latter shows an increase of $15,300,000, New York - an increase of $12,900,000 and Boston - an increase of $9,300,000. The other seven banks in the middle west and south report a total decrease of $9,100,000 in their holdings of discounted paper. Holdings of paper secured by United States Government obligations increased by $16,200,000, and of the total of $376,200,000 held on August 29 - $251,200,000 was secured by United States bonds, $108,300,000 by Treasury notes, and $16,500,000 by certificates of indebtedness.

Total gold reserves declined by $1,900,000. Changes in gold reserves of the Federal reserve banks during the week indicated a gold movement away from New York, San Francisco, Atlanta and Boston, to other Federal reserve banks, principally to Chicago, Cleveland and Dallas. Reserves other than gold increased by $1,800,000, while non-reserve cash declined by $10,900,000.

Only nominal changes are reported in Federal Reserve note circulation, the system as a whole showing a decrease of $300,000. The principal increases in note circulation are reported by Philadelphia, Cleveland and Kansas City, and the principal decreases by New York and Atlanta.

A summary of changes in the principal assets and liabilities of the reserve banks, as compared with a week and a year ago, follows:
