* September 8, 1921.

CONDITION OF MEMBER BANKS IN LEADING CITIES.

Substantial increases in demand and time deposits, as against moderate reductions in loans and investments are indicated in the Federal Reserve Board's weekly consolidated statement of condition on August 31 of 812 member banks in leading cities.

Loans secured by United States Government obligations show a decline for the week of about \$20,000,000, loans secured by corporate and other obligations declined by \$4,000,000, while other loans and discounts, largely of a commercial and industrial character, show an increase for the week of \$20,000,000. For the member banks in New York City a decline of \$11,000,000 in loans secured by Government obligations and increases of \$2,000,000 in loans secured by corporate and other obligations and of \$22,000,000 in commercial loans are shown.

Investments in Treasury certificates show a reduction for the week of \$13,000,000, while changes in the amounts of U. S. bonds, Victory notes and Treasury notes held by reporting member banks were only nominal. For the New York City banks a reduction of \$3,000,000 in certificate holdings, as against a nominal increase in other U. S. securities is noted. In consequence of the above changes, total loans and investments of the reporting institutions show a further decline for the week of \$22,000,000, the end-of-August total of \$14,762,000,000 being about 12.8 per cent below the total reported a year ago. For the New York City members, the corresponding amount was \$4,655,000,000, or 17.7 per cent below the corresponding 1920 total.

Total accommodation of reporting institutions at the Federal reserve banks shows a decrease for the week from \$967,000,000 to \$956,000,000, though the ratio of this accommodation to the banks' total loans and investments remains unchanged at 6.5 per cent. For the New York City banks, a decrease from \$247,000,000 to \$242,000,000 in the total borrowings from the local reserve bank, and from 5.3 to 5.2 per cent in the ratio of accommodation is noted.

Government deposits show a further reduction of \$30,000,000, of which \$12,000,000 represents net withdrawals from the New York City banks. Other demand deposits (net) increased by \$74,000,000, while time deposits show a gain of \$20,000,000 for the week. By far the larger increase in demand deposits, viz., \$60,000,000 is shown to have taken place at the New York banks in consequence of the large increase in amounts due to correspondent banks.

Reserve balances of the reporting banks at the Federal reserve banks show an increase for the week of \$7,000,000, in keeping with the increase in demand deposits shown. Cash in vault, on the other hand, shows a loss of \$12,000,000. For the New York City banks, an increase of \$14,000,000 in reserve balances at the local Federal reserve bank, and a decrease of \$5,000,000 in cash are noted.
