

CONDITION OF WEEKLY REPORTING MEMBER BANKS IN LEADING CITIES

The condition statement of weekly reporting member banks in leading cities shows the following principal changes for the week ended December 31: Decreases of \$1,230 million in reserve balances with Federal Reserve Banks and \$1,669 million in borrowings, and an increase of \$652 million in demand deposits credited to domestic banks.

Commercial, industrial, and agricultural loans decreased at the year-end, as they have done in 12 of the previous 14 years. The decrease at all reporting member banks was \$107 million, as compared with \$173 million in the comparable week a year ago. Changes according to industry are available in another press release.

A summary of assets and liabilities of reporting member banks follows:

Debits to demand deposit accounts, except interbank and U. S. Government accounts, during week	31,341	*December 24 figures revised (Chicago District)	

Beginning with the statement for Wednesday, March 11, 1953, which will be released on March 18, the weekly condition statement of reporting member banks in leading cities will be revised to include a few additional banks. The breakdown between loans for purchasing or carrying Government securities and loans for purchasing or carrying other securities will be continued by banks in New York City and Chicago, which make the bulk of such loans, but will be eliminated elsewhere. For purposes of comparability, the figures for March 4, 1953 will be made available on March 11 on the old basis and on March 18 on the new basis, but year-ago figures will not be revised, because it is anticipated that the changes will be relatively small on a national basis.

In conjunction with the conversion of the monthly debits series to a statement of debits to demand deposit accounts, for the purpose of reducing the reporting burden of the banks and to increase the value of the debits series, the weekly figures of debits that have been collected from reporting member banks will no longer be collected.
