

statistical release

H.6

For immediate release December 29, 1966

The seasonally adjusted money supply increased sharply in the week ending December 21, more than offsetting a moderate decline in the preceding week. The level for the first three weeks of December averaged \$170.1 million, \$900 million the higher than in November. Time deposits adjusted increased \$500 million further in the latest week, continuing the rapid expansion reported for the week ending December 14.

^{*-} Effective June 9, 1966, balances accumulated for payment of personal loans were reclassified for reserve purposes and are excluded from time deposits reported by member banks. The estimated amount of such deposits at all commercial banks (\$1,140 million) is excluded from time deposits adjusted thereafter.

p - Preliminary.

NOTE: Money supply consists of (1) demand deposits at all commercial banks, other than those due to domestic commercial banks and the U.S. Government, less cash items in process of collection and Federal Reserve float; (2) foreign demand balances at Federal Reserve Banks; and (3) currency outside the Treasury, the Federal Reserve and the vaults of all commercial banks. Time deposits adjusted are time deposits at all commercial banks other than those due to domestic commercial banks and the U.S. Government.
