## FEDERAL RESERVE

## statistical release

For immediate release
February 6, 1969.
The seasonally adjusted money supply increased $\$ 600$ million on average in January, about one-half the rate of expansion that occurred in the lasf quarter of 1968. After reaching a new high in early January, the money supply declined sharply. Time and savings deposits continued to decline through the end of January, and the average decline for the month on average was $\$ 1.8$ billion.

p - Preliminary.
NOTE: Money supply consists of (1) demand deposits at all comercial banks, other than those due to domestic commercial banks and the U.S. Government, less cash items in process of collection and Federal Reserve float; (2) foreign demand balances at Federal Reserve Banks; and (3) currency outside the Treasury, the Federal Reserve and the vaults of all comercial banks. Time deposits adjusted are time deposits at all comercial banks other than those due to domestic commercial banks and the U.S. Government.
