For immediate release

October 15 1970

Seasonally adjusted money supply data for the last half of September have been revised upward from the estimates published last week. The average level for September now shows a \$300 million increase from the preceding month instead of the slight decline reported earlier. The revised data indicate expansion over the third quarter at a 5.3 per cent annual rate. Both money supply and total time and savings deposits continued to increase in the first week of October.
