

April 27, 1971

MONEY STOCK MEASURES

The attached tables show measures of the daily average money stock and supporting deposit detail. Three money stock measures are shown: M_1 is the previously published money stock as narrowly defined to include currency in circulation outside banks plus demand deposits other than U.S. Government and interbank;^{1/} the M_2 measure is broader and includes M_1 plus commercial banks' savings deposits, time deposits open account, and time certificates of deposit other than negotiable CD's issued in denominations of \$100,000 or more by large weekly reporting commercial banks; M_3 is defined as M_2 plus deposits at mutual savings banks and savings and loan shares. All of the series are shown on both a seasonally adjusted and not seasonally adjusted basis. Since only end-of-month data are available for deposits at mutual savings banks and savings and loan associations, an estimate of M_3 is provided only monthly, whereas the other measures are provided weekly.

Measures of M_1 and M_2 are monthly averages of daily data for member banks. Estimates of nonmember banks deposits are based on June and December call report data and the relationship of nonmember and country bank deposits on those dates.

Data for nonbank thrift institutions are only available at the end of each month. In order to more nearly approach a monthly average concept comparable to the M_1 - M_2 measures, these end-of-month data have been averaged to derived a monthly figure. Thus, the figure shown for nonbank thrift institutions for the month of January is the average of the end-of-December and the end-of-January levels. February is the average of end-of-January and end-of-February levels, and so on.

The tables are organized to show the monthly data for M_1 , M_2 and M_3 , seasonally adjusted and not seasonally adjusted, first. The monthly tables are followed by weekly data for M_1 and M_2 seasonally adjusted and not seasonally adjusted. Seasonally adjusted monthly data for components of the money supply are then shown followed by weekly seasonally adjusted data for the same items. Monthly and weekly not seasonally adjusted data are shown last.

^{1/} For a detailed description of the M_1 measure of the money supply, see "A New Measure of the Money Supply," Federal Reserve Bulletin, October 1960 and "Revision of the Money Supply Series," Federal Reserve Bulletin, August 1962. For an explanation of the latest benchmark and seasonal adjustment changes as well as new data included in the series see "Revision of the Money Stock," Federal Reserve Bulletin, December 1970.
