^{1/} Implementation of revised Regulation J on November 9, because of its effects on clearing accounts on bank balance sheets, had the effect of raising demand deposits as calculated for inclusion in money supply. However, the resulting increase has been eliminated from current money supply data (beginning with the week ended November 15) in order to avoid a discontinuity in the series. The upward adjustment of money supply as a result of revised Regulation J will be incorporated in the statistics at the time of the regular annual benchmark and seasonal adjustment review. At the same time, historical figures will also be revised on a consistent basis. The forthcoming adjustments to the figures stemming from the change in Regulation J will primarily affect the level of the series and will themselves have minimal effects on rates of change.

^{2/} Includes (1) demand deposits at all commercial banks other than those due to domestic commercial banks and the U.S. Government, less cash items in the process of collection and F.R. float,

(2) foreign demand balances at F.R. Banks, and

(3) currency outside the Treasury, F.R. Banks and vaults of all commercial banks

^{3/} Includes, in addition to currency and demand deposits, savings deposits, time deposits open account, and time certificates of deposits other than negotiable time certificates of deposit issued in denominations of \$100,000 or more by large weekly reporting commercial banks

^{4/} Includes M₂, plus the average of the beginning and end of month deposits of mutual savings banks and savings capital at savings and loan associations
