1/ Estimates for July are based on data collected by the Federal Reserve and the FDIC from a stratified random sample of 551 banks and 102 mutual savings banks.

2/ Money market certificates (MMCs) are nonnegotiable time deposits in denominations of \$10,000 or more with original maturities of exactly 26 weeks for which the maximum permissable rate of interest on new deposits is related to the discount yield on the most recently issued 6-month Treasury bill (auction average). See Table 1.16 in the Federal Reserve <u>Bulletin</u> for specific ceiling rates.

3/ This category includes all 4-year and over variable ceiling accounts having no legal minimum denomination issued between July 1 and December 31, 1979 and all such 2-1/2 year and over variable ceiling accounts issued since January 1, 1980. See Table 1.16 in the Bulletin for specific ceiling rates.
