# FEDERAL RESERVE statistical release

H.6(508)

For Release at 4:15 p.m. EST January 28, 1983

#### NOTICE

Beginning today recently-authorized money market deposit accounts (MMDAs) are reported separately as a component of the broader money stock measures. Owing to the lack of historical data and the diverse sources of inflows to these accounts, they are treated on a not seasonally adjusted basis in constructing M2 and M3. Super NOW accounts continue to be included in the other checkable deposit component of M1.

1. Estimates are based on data collected by the Federal Reserve from a stratified random sample of about

550 banks and 90 mutual savings banks.
2. Money market deposit accounts (MMDAs)--Deposits with a \$2,500 initial and average balance requirement, no required minimum maturity but institutions must reserve the right to require at least seven days notice prior to withdrawal, no restrictions on depositor eligibility, or limitations on the amount of interest that may be paid unless the average balance falls below \$2,500 during which period the NOW account rate ceiling applies; such accounts may allow up to six transfers per month, no more than three of which may be by draft and may permit unlimited withdrawals by mail, messenger, or in person.

3. 7- to 31-day money market certificates are nonnegotiable time deposits that require a minimum daily balance of \$20,000, but less than \$100,000, and have an original maturity or required notice period of at least 7 days but no more than 31 days. The maximum permissible rate of interest is tied to the discount wind (suction average) on the most recently issued 91-day Transmury bill yield (auction average) on the most recently issued 91-day Treasury bill.

4. 91-day money market certificates are negotiable or nonnegotiable time deposits issued in denominations of at least \$7,500, but less than \$100,000, with original maturities of exactly 91 days for which the maximum permissible rate of interest on new deposits is tied to the discount yield on the most recently

issued 91-day (13-week) Treasury bill (auction average).
5. 6-month money market certificates (MMCs) are nonnegotiable time deposits in denominations of \$10,000, but less than \$100,000, with original maturities of exactly 26 weeks for which the maximum permissible rate of interest on new deposits related to the discount yield on the most recently issued 6-month

Treasury bill (auction average). 6. This category includes all 4-year and over variable ceiling accounts having no legal minimum denomination issued between July 1 and December 31, 1979 and all 2-1/2 year and over variable ceiling accounts

issued since January 1, 1980. 7. All Savers Certificates are one-year nonnegotiable time deposits that have an annual investment yield

equal to 70 percent of the average yield for 52-week U.S. Treasury bills.

8. Ceiling-free time deposits are all negotiable or nonnegotiable time deposits in denominations of less than \$100,000 with original maturities of 3-1/2 years or more that were authorized beginning May 1, 1982. Fixed-rate accounts pay one rate of return over the life of the instrument, whereas variable rate accounts pay a rate of return that may vary over the life of the instrument. Excludes IRA/Keogh accounts. 9. Ceiling-free IRA/Keogh time deposits of less than \$100,000 with original maturities of 1-1/2 years of more, were authorized beginning December 1, 1981. Fixed-rate accounts pay one rate of return over the life of the instrument, whereas variable rate accounts pay a rate of return that may change periodically over the life of the instrument. All other IRA and Keogh Plan time and savings deposits include all IRA/Keogh time

deposits regardless of maturity or ceiling rate. 10. Retail repurchase agreements are in denominations of less than \$100,000 with maturities of less than 90 days that arise from the transfer of direct obligations of, or obligations fully-guaranteed as to principal and interest by, the U.S. Government or an agency thereof.
