<sup>1.</sup> Estimates are based on data collected by the Federal Reserve from a stratified random sample of about 550 banks and 75 mutual savings banks. Until the end of September 1983 data were collected concerning specific indexed-ceiling and ceiling-free deposit accounts. Effective October 1, 1983, the DIDC deregulated time deposits, and this survey now provides information on all small interest-bearing time deposits by maturity category. The data presented for the end of October are not directly comparable to specific account data published previously, but include those balances.

Estimates for this category of deposits are based on data collected by the Federal Reserve from weekly deposit reports submitted by about 10,500 commercial banks.
