FEDERAL RESERVE statistical release

H.6(508)

NOTICE

Weekly seasonal factors for the nontransactions component of M2 (M2 less M1) beginning with the week of March 28, 1988 have been revised to incorporate further analysis of certain holiday-related effects. The revised factors for this component appear in Appendix Table 1.

FEDERAL RESERVE statistical release

These data are scheduled for release each Thursday at 4:30 p.m.

Footnotes appear on the following page. p--indicates preliminary data.

MONEY STOCK AND DEBT MEASURES

Percent change at seasonally adjusted annual rates

	M1	M2	M3	Debt ¹
3 Months from NOV. 1987 TO FEB. 1988	3.7	6.8	6.7	9.4
6 Months from AUG. 1987 TO FEB. 1988	3.5	5.4	6.3	9.3
12 Months from FEB. 1987 TO FEB. 1988	3.9	4.1	5.5	8.9
Thirteen weeks ending FEBRUARY 29, 1988 from thirteen weeks ending:				
NOV. 30, 1987 (13 weeks previous)	2.2	4.6	5.3	
•		1.0	5.5	
AUG. 31, 1987 (26 weeks previous)	3.3	4.5	5.4	

Growth rates for debt are based on periods beginning and ending one month earlier than for the monetary aggregates, namely, October 1987 to January 1988, July 1987 to January 1988, and January 1987 to January 1988, respectively.

Footnotes to Table 1

Consists of (1) currency outside the U.S. Treasury, Federal Reserve Banks, and the vaults of depository institutions; (2) travelers checks of nonbank issuers; (3) demand deposits at all commercial banks other than those due to depository institutions, the U.S. government, and foreign banks and official institutions, less cash items in the process of collection and Federal Reserve float; and (4) other checkable deposits (OCDs), consisting of negotiable order of withdrawal (NOW) and automatic transfer service (ATS) accounts at depository institutions, credit union share draft accounts and demand deposits at thrift institutions. Seasonally adjusted M1 is calculated by summing currency, travelers checks, demand deposits, and OCDs, each seasonally adjusted separately.

Consists of M1 plus overnight (and continuing contract) RPs issued by all commercial banks and overnight Eurodollars issued to U.S. residents by foreign branches of U.S. banks worldwide, money market deposit accounts (MMDAs), savings and small-denomination time deposits (time deposits—including retail RPs—in amounts of less than \$100,000), and balances in both taxable and tax-exempt general purpose and broker/dealer money market mutual funds. Excludes individual retirement account (IRA) and Keogh balances at depository institutions and money market funds. Also excludes all balances held by U.S. commercial banks, money market funds (general purpose and broker/dealer), foreign governments and commercial banks, and the U.S. government. Seasonally adjusted M2 is computed by adjusting its non-M1 component as a whole and then adding this result to seasonally adjusted M1.
Consists of M2 plus large-denomination time deposits (in amounts of \$100,000 or more) and term RP liabilities issued by commercial banks and thrift institutions, term Eurodollars held by U.S. residents at foreign branches of U.S. banks worldwide and at all banking offices in the United Kingdom and Canada, and balances in both taxable and tax-exempt institution-only money market mutual funds. Excludes amounts held by depository institutions, the U.S. government, money market funds, and foreign banks and official institutions. Also subtracted is the estimated amount of overnight RPs and Eurodollars held by institution-only money market mutual funds. Seasonally adjusted M3 is obtained by adjusting its non-M2 component as a whole and then adding this result to seasonally adjusted M3. Consists of M3 plus the nonbank public holdings of U.S. savings bonds, short-term Treasury securities, commercial paper and bankers acceptances, net of money market mutual fund holdings of these assets.

Debt of domestic nonfinancial sectors consists of outstanding credit market debt of the U.S. government, state and local governments and private nonfinancial sectors. Privat Consists of MI plus overnight (and continuing contract) RPs issued by all commercial banks and overnight Eurodollars issued

(including bank loans), other bank loans, commercial paper, bankers accepta ces and other debt instruments.

The data are derived from the Federal Reserve Board's flow of funds account. All data on debt of domestic nonfinancial sectors are presented in month-average form, derived by averaging adjacent month-end levels. These data have also been adjusted to remove statistical discontinuities that may arise in the underlying flow of funds statistics. The presentation of debt data in this release differs, therefore, from the quarterly flow of funds statistics contained in the Federal Reserve releases Z.7 and Z.1. In those releases, published levels c. credit market debt are measured on a quarter-end basis and include discontinuities.

p--indicates preliminary data.

Currency outside U.S. Treasury, Federal Reserve Banks and the vaults of depository institutions.
Outstanding amount of U.S. dollar-denominated travelers checks of nonbank issuers. Travelers checks issued by depository institutions are included

In demand deposits.

Demand deposits at commercial banks and foreign-related institutions other than those due to depository institutions, the U.S. government and foreign banks and official institutions, less cash items in the process of collection and Federal Reserve float.

Consists of NOW and ATS balances at all depository institutions, credit union share draft balances and demand deposits at thrift institutions.

Sum of overnight RPs and overnight Eurodollars, money market fund balances (general purpose and broker/dealer), MMDAs, and savings and small time deposits. This seasonally adjusted as a whole.

Sum of large time deposits, term RPs and term Eurodollars of U.S. residents, money market fund balances (institution-only), less the estimated amount of overnight RPs and Eurodollars held by institution-only money market funds. This sum is seasonally adjusted as a whole.

Savings deposits exclude MMDAs.

Small denomination time deposits--including retail RPs--are those issued in amounts of less than \$100,000. All IRA and Keogh account balances at commercial banks and thrifts are subtracted from small time deposits. e--indicates estimated data.

FEBRUARY	759.6	759.4	757.5	1.1	2.7	1 7

^{1.} Standard monthly seasonal factors are derived at the beginning of each year by applying an X-11/ARIMA- based procedure to the data through the end of the previous year.

 $[\]hbox{2. Concurrent monthly seasonal factors are derived each month by applying an $X-11/ARIMA-based procedure to data through that month.}$

^{3.} Alternative monthly seasonal factors are derived using an experimental model-based procedure. This procedure uses a combination of statistical regression and time series modeling techniques to construct seasonal factors that are more sensitive than standard factors to unique characteristics of each series. These characteristics include fixed and evolving seasonal patterns, trading day effects, within-month seasonal variations, holiday effects, outlier adjustments, special events adjustments and serially correlated noise components.
