The data are derived from the Federal Reserve Board's flow of funds accounts. All data on debt of domestic nonfinancial sectors are presented in month-average form, derived by averaging adjacent month-end levels. These data have also
been adjusted to remove statistical discontinuities that may arise in the underlying flow of funds statistics, The Federal Reserve releases $Z .7$ and $Z$.1. In those releases, published levels of credit market debt are measured on a quarter-end basis and include discontinuities.
