#### H.6 (508) Table 2 MONEY STOCK AND DEBT MEASURES

Percent change at seasonally adjusted annual rates

		M1	M2	M3	Debt <sup>1</sup>
3 Months from SEP. 1988 TO	DEC. 1988	2.6	4.2	5.1	8.5
6 Months from JUNE 1988 to	DEC. 1988	2.8	3.3	4.7	8.6
12 Months from DEC. 1987 TO	DEC. 1988	4.9	5.7	6.5	8.7
Thirteen weeks ending JANUAR	RY 2, 1989				
Thirteen weeks ending JANUAF from thirteen weeks end	-				
OCT. 3, 1988 (13 weeks prev	vious)	1.2	3.0	4.2	
	vious)	1.2 3.2	3.0 3.2	4.2 4.9	

Growth rates for debt are based on periods beginning and ending one month earlier than for the monetary aggregates, namely, August 1988 to November 1988, May 1988 to November 1988, and November 1987 to November 1988, respectively. 1.

Footnotes to Table 1

- Consists of (1) currency outside the U.S. Treasury, Federal Reserve Banks, and the vaults of depository institutions; (2) travelers checks of nonbank issuers; (3) demand deposits at all commercial banks other than those due to depository institutions, the U.S. government, and foreign banks and official institutions, less cash items in the process of collection and Federal Reserve float; and (4) other checkable deposits (OCDs), consisting of negotiable order of withdrawal (NOW) and automatic transfer service (ATS) accounts at depository institutions, credit union share draft accounts and demand deposits at thrift institutions. Seasonally adjusted M1 is calculated by summing currency, travelers checks, demand deposits, and OCDs 1.
- at thrift institutions. Seasonally adjusted M1 is calculated by summing currency, travelers checks, demand deposits, and OCDs, each seasonally adjusted separately. Consists of M1 plus overnight (and continuing contract) RPs issued by all commercial banks and overnight Eurodollars issued to U.S. residents by foreign branches of U.S. banks worldwide, money market deposit accounts (MMDAs), savings and small-denomination time deposits (time deposits--including retail RPs--in amounts of less than \$100,000), and balances in both taxable and tax-exempt general purpose and broker/dealer money market mutual funds. Excludes individual retirement account (IRA) and Keogh balances at depository institutions and money market funds. Also excludes all balances held by U.S. commercial banks, money market funds (general purpose and broker/dealer), foreign governments and commercial banks, and the U.S. government. Seasonally adjusted M2 is computed by adjusting its non-M1 component as a whole and then adding this result to seasonally adjusted M1. Consists of M2 plus large-denomination time deposits (in amounts of \$100,000 or more) and term RP liabilities issued 2.
- 3.
- 4.
- adding this result to seasonally adjusted M1. Consists of M2 plus large-denomination time deposits (in amounts of \$100,000 or more) and term RP liabilities issued by commercial banks and thrift institutions, term Eurodollars held by U.S. residents at foreign branches of U.S. banks worldwide and at all banking offices in the United Kingdom and Canada, and balances in both taxable and tax-exempt institution-only money market mutual funds. Excludes amounts held by depository institutions, the U.S. government, money market funds, and foreign banks and official institutions. Also subtracted is the estimated amount of overnight RPs and Eurodollars held by institution-only money market mutual funds. Seasonally adjusted M3 is obtained by adjusting its non-M2 component as a whole and then adding this result to seasonally adjusted M2. Consists of M3 plus the nonbank public holdings of U.S. savings bonds, short-term Treasury securities, commercial paper and bankers acceptances, net of money market mutual fund holdings of these assets. Debt of domestic nonfinancial sectors consists of outstanding credit market debt of the U.S. government, state and local governments and private nonfinancial sectors. Private debt consists of corporate bonds, mortgages, consumer credit (including bank loans), other bank loans, commercial paper, bankers acceptances and other debt instruments. The data are derived from the Federal Reserve Board's flow of funds accounts. All data on debt of domestic nonfinancial sectors are presented in month-average form, derived by averaging adjacent month-end levels. These data have also been adjusted to remove statistical discontinuities that may arise in the underlying flow of funds statistics contained in the Federal Reserve releases Z.7 and Z.1. In those releases, published levels of credit market debt are measured on a quarter-end basis and include discontinuities. 5.

1.

Currency outside U.S. Treasury, Federal Reserve Banks and the vaults of depository institutions. Outstanding amount of U.S. dollar-denominated travelers checks of nonbank issuers. Travelers checks issued by depository institutions are included 2.

Outstanding amount of U.S. dollar-denominated travelers checks of nonbank issuers. Travelers checks issued by depository institutions is a commercial banks and foreign-related institutions other than those due to depository institutions, the U.S. government and foreign banks and official institutions, less cash items in the process of collection and Federal Reserve float. Consists of NOM and ATS balances at all depository institutions, credit union share draft balances and demand deposits at thrift institutions. Sum of overnight RPs and overnight Eurodollars, money market fund balances (general purpose and broker/dealer), MMDAs, and savings and small time deposits. This sum is seasonally adjusted as a whole. Sum of large time deposits, term RPs and term Eurodollars of U.S. residents, money market fund balances (institution-only), less the estimated amount of overnight RPs and eurodollars held by institution-only money market funds. This sum is seasonally adjusted as a whole. Sum of large time deposits, term RPs and term Eurodollars of U.S. residents, money market funds balances (institution-only), less the estimated amount of overnight RPs and eurodollars held by institution-only money market funds. This sum is seasonally adjusted as a whole. Savings deposits exclude MMDAs. Small denomination time deposits--including retail RPs--are those issued in amounts of less than \$100,000. All IRA and Keogh account balances at 3. 4.

5. 6.

7.

8.

Small denomination time deposits--including retail RPs--are those issued in amounts of less than \$100,000. All IRA and Keogh account balances at commercial banks and thrifts are subtracted from small time deposits. e--indicates estimated data.

p--indicates preliminary data.

1.

Term RPs are those with original maturities greater than one day, excluding continuing contracts and retail RPs. Includes a relatively small amount of overnight RPs at thrift institutions. Term Eurodollars are those with original maturities greater than one day. Consists of those issued to U.S. residents by foreign branches of U.S. banks world-wide and by all banking offices in the United Kingdom and Canada. Excludes those held by depository institutions and money market mutual funds. Consists of U.S. Treasury bills and coupons with remaining maturities of less than 12 months held by other than depository institutions, Federal Reserve Banks, money market mutual funds, and foreign entities. Net of bankers acceptances held by accepting banks, Federal Reserve Banks, foreign official institutions, Federal Home Loan Banks, and money market mutual funds. Total commercial paper less commercial paper held by mercy we take the definition. 2. 3.

4.

5.

Total commercial paper less commercial paper held by money market mutual funds. Debt data are on a monthly average basis, derived by averaging adjacent end-of-month levels, and have been adjusted to remove discontinuities. 6. p--indicates preliminary data.

8

NOVEMBER	783.6	785.5	781.6	0.2	1.8	-2.8		
DECEMBER	787.5	788.8	786.8	6.0	5.0	8.0		

1. Standard monthly seasonal factors are derived at the beginning of each year by applying an X-11/ARIMAbased procedure to the data through the end of the previous year.

2. Concurrent monthly seasonal factors are derived each month by applying an X-11/ARIMA-based procedure to data through that month.

3. Alternative monthly seasonal factors are derived using an experimental model-based procedure. This procedure uses a combination of statistical regression and time series modeling techniques to construct seasonal factors that are more sensitive than standard factors to unique characteristics of each series. These characteristics include fixed and evolving seasonal patterns, trading day effects, within-month seasonal variations, holiday effects, outlier adjustments, special events adjustments and serially correlated noise components.
