1. Growth rates for debt are based on periods beginning and ending one month earlier than for the monetary aggregates, namely,
May 1989 to August 1989 , February 1989 to August 1989 , and August 1988 to August 1989 , respectively.

Footnotes to Table 1

1. Consists of (I) currency outside the U.S. Treasury, Federal Reserve Banks, and the vaults of depository institutions 3 !2) travelers checks of nonbank issuers 3 ( 3 ) demand deposits at all commercial banks other than those due to depository and Federal Reserve fioat; and (4) other checkable deposits (OCDs), consisting of negotiable order of withdrawal (NOW) and automatic transfer service (ATS) accounts at depository institutions, credit union share draft accounts and demand deposits at thrift institutions. Seasonally adjusted Ml is calculated by summing currency, travelers checks, demand deposits, and
2 OCDs, each seasonally adjusted separately.
2. Consists of Ml plus overnight (and continuing contract) RPs issued by all commercial banks and overnight Eurodollars issued to U.S. residents by foreign branches of U.S. banks worldwide, money market deposit accounts (MMDAs), savings and small-
denomination time deposits (time deposits-including retail RPs-in amounts of less than $\$ 100,000$ ), and balances in both denomination time deposits rime deposits-including retail Rps--in amounts of less than $\$ 100$, 000 , and balances in both (IRA) and Keogh balances at depository institutions and money market funds. Also excludes all balances held by U.S. commercial banks, money market funds (general purpose and broker/dealer), foreign governments and commercial banks, and the U.S. government. Seasonally adjusted M2 is computed by adjusting its non-M1 component as a whole and then adding this result to seasonally adjusted M1.
3. Consists of M2 plus large-denomination time deposits (in amounts of $\$ 100,000$ or more) and term Rp liabilities issued by commercial banks and thrift institutions, term Eurodollars held by U.S. residents at foreign branches of U.S. banks worlowide and at all banking offices in the United Kingdom and Canada, and balances in both taxable and tax-exempt institution-only money market mutual funds. Excludes amounts held by depository institutions, the U.S. government, money market funds, and foreign banks and official institutions. Also subtracted is the estimated amount of overnight Rps and Eurodollars held by institution-only money market mutual funds. Seasonally adjusted M3 is obtained by adjusting its non-M2 component as a whole and then adding this result to seasonally adjusted M2.
4. Consists of M3 plus the nonbank public holdings of U.S. savings bonds, short-term Treasury securities, commercial paper
5. and bankers acceptances, net of money market mutual fund holdings of these assets.

Debt of domestic nonfinancial sectors consists of outstanding credit market debt of the U.S. government, state and local governments and private nonfinancial sectors. Private debt consists of corporate bonds, mortgages, consumer credit The data are derived from the Federal Reserve Board's flow of funds accounts. All data on debt of domestic nonfinancial sectors are presented in month-average form, derived by averaging adjacent month-end levels. These data have also been adjusted to remove statistical discontinuities that may arise in the underlying flow of funds statistics. The presentation of debt data in this release differs, therefore, from the quarterly flow of funds statistics contained in the Federal Reserve releases z. 7 and z.l. In those releases, published levels of credit market debt are measured on a quarter-end basis and include discontinuities.
