NOIES: The demand deposit component consists of demand deposits other than domestic commercial interbank and U. S. Government, less eash items reported as in prosess of collection and Federal Reserve float. Cash items reported as in the process of collection by member banks are deducted from the demand deposits of member banks and nồmember commercial bank derand deposits follow a parallel logic. Since Fèderal Reserve float is not divisible on the basis of member-nomember attribution, it is deducted in whole from the member bank demand deposit component (column 1)., The currency, component consists of currency outside the Treasury, the Federal Reserve, and the vaults of all, commercial banks.
